

Cutting Instructions:

From your 6 background fabrics, cut 4 – 10" squares from each. From your panel, cut 24 "pictures" with ¼" seam allowance around each.

Sewing Instructions: NOTE - Be sure to watch our YouTube video tutorial for a fantastic demonstration of the following steps!

Center a panel onto a background piece with both right sided facing up. Fold the right side of the background over the panel so that the fold line is right along the cut edge of the panel and steam press. Repeat with the left side of the background. Open up both folds. Fold the top side of the background over the panel so that the fold line is right along the cut edge of the panel and steam press, being careful that you keep the first two folded lines. Repeat with the bottom side of the background.

With the background still folded, stitch a ¼" away from the fold. This stitching will enclose the raw edge of your panel inside the seam. Repeat with the opposite side, and iron the background open with the seam allowances facing away from the center. Refold the other two sides along the fold lines and stitch along the fold, using a ¼" seam allowance and again iron flat with the seam allowances away from the center. Repeat with the other 23 panels and backgrounds.

Layout your finished squares in a 4 x 6 patchwork. Stitch into rows, and stitch the rows together.

Cut border fabric 5 @ 3" WOF and sew onto all sides of your patchwork. **Quilt, bind, and enjoy!**
