

NR 997 STYLE GT3 FRONT BUMPER FOR 986 & 996 '99-'01

Bumper requires **997** side marker lights

It is necessary for the body shop to make a bracket to install the side markers to the black plastic that the bumper attaches to in the side marker area.

It may also be necessary to shorten the front reinforcement to fit this bumper

URETHANE PAINTING INSTRUCTIONS

1. Fill all slight imperfections, if applicable, with a flexible putty and sand smooth.
2. Clean surface and all edges with either Dupont 2319S or Sherwin Williams R7K157 or R7K158 or equivalent.
3. Apply adhesion promoter or equivalent Dupont #2322.
4. Please note that some painters prefer, after cleaning the surface, to apply Dupont "Variprime". Let dry and scuff with a Scotchbrite pad and then apply basecoat/clearcoat.
5. Apply basecoat/clearcoat following manufacturers recommendations for painting a flexible polyurethane plastic.

****Consult your local paint supplier for best materials to use in your area**
