

997 GT2 Bolt-on Wing

- It will be necessary to disable the electric spoiler as it will no longer extend at speed
- Line up wing to its' proper position on the engine lid
- Drill holes on under-side of engine lid
- Prior to prep and paint, mount wing to make sure of fit using counter sunk machined screw provided
- Prep and paint part

A replacement wire harness is needed in your engine compartment to eliminate the fault light showing on your dash. It will be necessary to have a dealer reset your fault light after new wing and harness is installed.

PREPPING INSTRUCTIONS FOR FRP PARTS

****Fit parts before prep and paint****

Our NR Automobile body parts come with a sealer poly primer. This primer will fill in any small pinholes that may be present. Parts need to be sanded before painting and may require another primer coat before painting. Do not bake parts during the painting process.
