

#99781

## 997TT Type 1 Rear Valance with Finned Diffuser

We recommend the finned area on the rear skirt be painted matte black and the rest of the skirt painted the color of the car.

It will be necessary to remove rear panel under the bumper before the rear skirt can be installed. Rear skirt is installed using original slotted opening at the bottom of the bumper. Mesh grills can be used in the openings on the rear skirt.

### PREPPING INSTRUCTIONS FOR FRP PARTS

**\*\*Fit parts before prep and paint\*\***

Our NR Automobile body parts come with a sealer poly primer. This primer will fill in any small pinholes that may be present. Parts need to be sanded before painting and may require another primer coat before painting. Do not bake parts during the painting process.
