Ammonia, which is a main component in pet odors, has a tendency to spread throughout the room because it is lighter than air. By installing this product above the pet litter area where pet stench is a concern, odors can be quickly removed and deodorized.

Our product operates so quietly*1 that it does not disturb surrounding pets and humans, so it can be used 24 hours a day, 7 days a week!

*1 In standard mode, the sound levels at approximately 3.3 ft from the outlet port and the inlet port are just 26 dB and 22 dB, respectively. Measured by Sunstar Engineering Inc. Depending on the measurement conditions, values could vary.

Precautions for installation

Contact a hardware store or qualified contractor to install the bracket if you have any questions or concerns. You risk the possibility of damaging the Air Purifier, damaging other property and personal injury if the bracket is not installed properly. Check to make sure there are no missing or defective parts. Do not attempt to install the bracket if there are missing or defective parts.

Before doing installation, be sure to shift all the cages and pet toilets to evacuate your pets around them.

- Check that the wall is flat and is strong enough to fix the bracket.
- Note the following points according to the wall material.
  - Use nails, in installation to a drywall. (Using wood screws may cause the product to drop.)
  - Use wood screws, in installation to a wooden board wall.
  - In installation to a concrete wall, use commercial anchor plugs for correct attachment. (Anchor plugs are not supplied.)
- Avoid installation to the following places:
  - A place where your pets could splash urine or tamper
  - A place where vibrations are strong
  - A place near combustibles such as a curtain and a wastebasket
  - A place within the reach of babies and infants
  - A place that is hot and humid or where water will splash, such as a bathroom
  - A place where greasy fumes or combustible gas may be used or leak
  - A place exposed to direct sunlight or heaters
  - A place where the air intake or the air outlet will be blocked with a curtain

How to Mount

Mount the product correctly, referring to this manual and the attached sheet Full-scale Drawing (A). The mounting procedure varies with the wall material. Check the wall material at a mounting area.

1. Checking the wall material at a mounting area

   - For drywall
     - See the mounting procedure for drywall.
     - To be used: Coin, Scissors
     - To be prepared: Coin, Scissors
     - * No wood screws (C) will be used.
   - For wooden board
     - See the mounting procedure for wooden board.
     - To be used: Phillips screwdriver, Scissors
     - To be prepared: Phillips screwdriver, Scissors
     - * No nails (B) will be used.
   - For concrete
     - The same as “For wooden board wall.”
     - To be prepared: Commercial anchor plugs

SUNSTAR is not liable for damage or injury caused by incorrect mounting, incorrect assembly or incorrect usage.

- After installing the bracket, make sure it is firmly in place before putting QAIS-air- on it.
- Take care not to drill or screw into existing wiring in the wall while installing the bracket.
2 Determining the mounting position

For drywall

① Make a cut along the cut line (D) on the Full-scale Drawing (A).
② Using the Full-scale Drawing (A), determine the mounting position.

For wooden board

① Cut off the cutoff slip (1) on the Full-scale Drawing (A).
② Using the Full-scale Drawing (A), determine the mounting position.

3 Attaching the bracket to the wall

For drywall

① Using a nail (B), fix the bracket to the bracket mounting position. Fix it to the positioning nail hole (E).
② Remove the Full-scale Drawing (A). Bring it into level.
③ Determine the angle, and fix it with a nail (B).
④ Fix it to the wall with eight nails (B). Fix it at the four mounting nail holes (H).

For wooden board

① Temporarily fix the bracket to the bracket mounting position with a wood screw (C).
② Remove the Full-scale Drawing (A). Draw out right straight.
③ Bring it into level. Guiding hook (F).
④ Determine the angle, and fix the bracket with a wood screw (C).
⑤ Fix it to the wall with wood screws (C), and additionally tighten them.

4 Connecting the AC adapter to the main body

① Insert the terminal of the AC adapter into the main body.
AC adapter terminal
② Pass the cord through the retainer of the main body.
Retainer

5 Attaching the main body to the bracket

① Align a position directing line on the main body with the position directing guide of the bracket, and push that in straight.
② Put the main body on the main body mounting hooks.

6 Attaching the cord covers

A wire may break if your pets gnaw the power cord. Use the cord covers to protect your pets from tampering the power cord.
① Stick the cord covers (Base) to the wall.
② Fit the cord into the cord covers (Base).
③ Attach the cord covers (Cover).
④ Put the AC adapter into an outlet.

This concludes the installation. Follow the Instruction Manual during use.
