

# WATERJET CUTTERS

## ADVANTAGES AND DISADVANTAGES

---

### CUTTING THROUGH THE HYPE

---

Cold Cutting = No hardening

Cuts any material

Reduces dust and harmful gases = More Eco-Friendly

Eliminates secondary finishing

Ability to cut in any direction offering greater nesting abilities

Slower than Plasma Cutting

High initial cost

Water may need to be filtered and deionized

Thick parts lose the dimensional accuracy

The harder the material the slower the cut increasing cutting cost
