

Twist Dynamics Slingshot Trailer Hitch

Built for Performance. Designed for Convenience. Made in the USA.

The Twist Dynamics Slingshot Trailer Hitch is engineered specifically for the Polaris Slingshot. Offering an easy-to-use, high-performance towing solution. Designed and built by a family-owned business in the USA, this hitch is perfect for those who demand reliability, strength, and style.

Key Features:

- 100% USA Made: Designed, built, and factory-tested by a family-owned business.
- Heavy-Duty Steel Construction: Engineered for extreme performance and durability.
- Sleek, Stealth Design: When not in use, the slide-in hitch portion can be easily stored behind your seat for a streamlined, clean look.
- Easy Installation: Can be installed by a dealer or as a DIY project with the instructions provided.
- Maximum Towing Capacity: 600 lbs (combined trailer and cargo). Recommended trailer weight should not exceed 200 lbs.
- Tongue Weight: **Do not exceed 20 lbs tongue weight before connecting to your trailer. Maximum tongue weight with the hitch and ball mount is 34 lbs.**

Specifications:

- Bolt-on installation/Torque specifications: 60 ft-lbs using a torque wrench (not an impact wrench).
- Weight: The Slingshot Hitch with ball & tightener weighs approximately 18 lbs.
- Trailer Wiring: Requires a plug-and-play wiring harness (sold separately).
- Safety First: Always use the supplied anti-rattle hitch tightener and follow safety protocols, including using the safety pin and chains.

Warning & Notices:

- Warning: Overloading the vehicle or trailer can result in serious injury or death.
- Notice: Always adhere to manufacturer recommendations regarding weight, tire pressure, and suspension limits. Remove the hitch ball when not in use.
