User Guide**The Rechargeable Portable Baby Rocker**

Thank you for buying the Rockit portable baby rocker. It can be fitted to most prams and car seats. It gently rocks to soothe your baby to sleep and is suitable for use with children aged 0-36 months.

WARNING:
CHOKING HAZARD - Small Parts.
Keep out of reach of children.
THIS IS NOT A TOY

WEEE compliant product do not dispose of with household waste. Please recycle where available. Recycle with your local authority or recycling centre.

What's in the Box?**4 Attaching the Rockit****7 Frequently Asked Questions****What age child can I use the Rockit with?**

The Rockit is suitable for use with children from birth up until around 3 years old.

Is the rocking motion safe?

Yes. We have based the rocking motion on the way parents rock their children by hand. For more information visit www.rockitrocker.com/safety

Why is there a fast speed when the Rockit is first turned on?

This is normal and is induced so the Rockit can get the weight inside spinning.

Can I use the Rockit on a cot, crib or car seat?

No. The Rockit is designed for strollers and prams only.

Why is there a 1 hour timer on the Rockit?

The Rockit is not designed to keep a child asleep for an extended period. It's meant to be a helping hand to soothe a baby and help them drift off to sleep or maintain their sleep when the stroller or pram stops.

Can the Rockit be used in the rain?

Yes. The Rockit is shower proof (Tested to IPX1 standards). Avoid exposure to prolonged or heavy rain.

How do I clean the Rockit?

The Rockit can be surface cleaned with a damp cloth. Do not submerge in water.

Can I buy additional brackets to fit the Rockit to other pushchairs or prams?

Yes. These can be purchased from our website: www.rockitrocker.com or check with your local distributor.

Safety

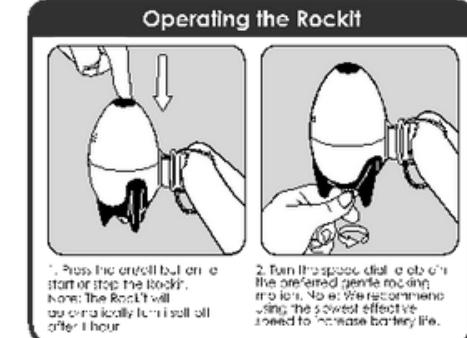

WARNING: THIS IS NOT A TOY

- Please read the user guide carefully and keep for future reference.
- Do not assemble and use by adults only. Not to be used by persons under the age of 14.
- Only to be used on prams and car seats. Do not use on cots, beds or car seats.
- Always ensure that strollers and prams are on a level surface and the brake is firmly applied before attaching and operating the Rockit.
- The Rockit should be positioned out of reach of the child.
- Never mount the Rockit directly above the child.
- Adult supervision required. Do not leave the child unattended.
- Charging should only be done by an adult.
- Only charge with the cable provided integrated into the USB power supply which has output rated 5V.
- Only connect to a USB power supply bearing either of the following symbols:
- The Rockit is 'waterproof' (IPX1). Avoid exposure to prolonged or heavy rain and ensure it is completely dry before charging.
- Regularly check that the product is firmly attached to the stroller or pram.
- Discard if the product is damaged.
- After use, remove the Rockit from the bracket and store in a safe place, out of reach of children.
- Babies are safest sleeping flat and on their backs.

5 Top Tips

Position the Rockit so that it doesn't protrude and get knocked when wheeling through doorways, but always make sure it is out of reach of children.

Often a slow to medium speed gives the most effective rocking motion. This also has the benefit of increasing the battery life.

After Use

Carefully remove the Rockit from the bracket and store in a safe place, out of reach of children. Do not leave the Rockit in the stroller when not in use.

The Rockit can be left in the attachment on the stroller.

Setting up the Rockit**Fitting the Bracket:**

The Rockit bracket should be positioned out of reach of the child and fitted high up on the frame or handle.

The universal bracket fits most strollers.

Fit the Rockit within the bracket so you can alter the handle position when fitting to different sized strollers.

Correct position of the Rockit in the stroller or handle. Do not position it only above the child.

After use, remove the Rockit from the bracket and store in a safe place, out of reach of children.

Babies are safest sleeping flat and on their backs.

Charging

Charge until the green LED glows. Only charge with the cable provided integrated into the USB power supply with an output rated 5V. After charging ensure the rubber USA cover is secured to help prevent water ingress.

6 Troubleshooting

The Rockit has stopped working. The 1-hour timer automatically switches the Rockit off. Press the on/off button to restart.

The Rockit won't start, or is running very slowly. Turn up the speed dial to increase the speed. If this no longer works, recharge the battery.

The Rockit is not giving a gentle rocking motion. Adjust the speed dial to get a gentle rock (often this is achieved at a slower speed). Turning clockwise increases the speed, while anticlockwise decreases the speed.

Our Other Products

At Rockit we design innovative products to help babies and older children to sleep.

Woosh is the small but mighty sound soother. Choose from 2 sounds and 4 volume levels to find the perfect soothing environment for your baby. Its versatile design allows you to stand, sit or lay it out of reach of your baby.

Zed Soothes babies to sleep, just like the cow bed mannering the feeling of being in a cow's udder. Its unique technology creates a soothing low frequency vibration that is known to calm babies to sleep. Simply place Zed on the mattress by your baby's feet and press the snooze button. The finely tuned vibration app is gentle enough to wake the mattress, comforting your baby and encouraging a deep sleep.

After Use

Carefully remove the Rockit from the bracket and store in a safe place, out of reach of children. Do not leave the Rockit in the stroller when not in use.

The Rockit can be left in the attachment on the stroller.

9 Important

Important! Always rotate the Rockit so it points straight up.
