

◀ SERVICES FOR PROFESSIONALS ▶

Lurpe Natural Solutions is a company specialized in formulation and preparation of specific blends for plant nutrition and soil improvement.

Our goal is to offer comprehensive soil fertility management to our clients.

Integrated soil fertility management is the key to raising productivity levels sustainably over time. Based on the analyzes, our knowledge and experience, we design specific blends for each case.

In each project we look for the best way to adapt to the different resources available.

🌊 We optimize the fertilizer costs of your crop and improve the results. 🌱

◀ Soil crops ▶

We design specific amendments for each client. We offer a metagenomic and physical chemical analysis service. With the data obtained, we select the amendments and the most suitable microorganisms.

◀ Potted crops ▶

Our **Farmer Mix** is a blend of natural amendments for a full 12-14 weeks cycle. It has everything you need to get the best results by adding **ONLY WATER**.

We present you **Farmer Mix**, the most comfortable and simple way to grow in living soil obtaining the best results in terms of yield and organoleptic properties.

Thanks to the presence of **bacteria**, beneficial microorganisms for the roots and the availability of micro and macro nutrients in slow decomposition, **Farmer Mix** is introduced at the beginning of the cycle and for the next 14 weeks it is no longer necessary to fertilize, just irrigate with dechlorinated water. At the end of the cycle, you can recycle your substrate and use it again, thus generating savings in economic terms and human resources and reducing your waste production drastically.

It can be used **indoors**, **outdoors** and in **greenhouses**, both in pots and in soil.

CONTAINS: Bat Guano, Bone Meal, Kelp Meal, Azomite®, Organic Alfalfa, Insect Frass, Blood Meal, Dolomite, Langbeinite, Humic and Fulvic Acids, with a complex melange of beneficial Rhizobacteria and Trichoderma.

All ingredients are authorized for ecological agriculture.

FORMATS: 20 kg bag and 1.000 kg Big bag

HOW TO USE: Add 10-20% Insect Frass/humus and 9-11 g/l of **Farmer Mix** to your substrate. **Allows you to irrigate with water only.** Ideal for drip irrigation (avoids obstructions caused by remnants of fertilizer).

Important: dechlorinate the water to avoid deterioration of the microorganisms.
