Patchwork carpets, which are also unique pieces, are all handmade by cutting and artfully sewing together vintage carpets that are subsequently dyed with monochromatic vegetable dyes, allowing an array of colours ranging from bright shades to pale, natural ones. The patchwork technique allows the creation of carpets of the desired size assembled to achieve the desired final visual effect. Indeed, in patchwork the overall composition is pieced together from details, thus enhancing the charm of the decorations and textures of Oriental carpets. All the sewing is done by hand and using precious yarns according to the ancient art of embroidery.
