SEELA

Antti Kotilainen | 2018

Outdoor is, above all, a question of sensitivity, the eyes and the soul seeking answers in nature and in its endless shapes. The beauty of Finnish design arises from this tension. And SEELA, a small masterpiece of serenity, is the result of the partnership between Antti Kotilainen and Lapalma. Its base supports are ultra-light, whereas the polypropylene in the colours of rock, ice, snow and wood, is a seamless line extending from the extremely comfortable seat and continuing in the embracing backrest. Disassembled and completely recyclable at the end of its life, SEELA features a perfectly integrated pad that can be replaced over the years, maximizing its life cycle and durability. It is also available in a stool version.

SEELA

use and maintenance instructions

Plastic materials, even if intended for outdoor use, may still be attacked over time by particular atmospheric pollutants (e.g. acid rain, high concentration of PM10, nitrogen oxides, hydrocarbons, etc.). Any changes in the surface and in colours may therefore occur under particular conditions of exposure and cannot be considered grounds for any claims.

Do not use detergents containing bleach, hydrochloric acid or products containing chloride on any metal parts. Salt, limescale or acid (from coffee, wine, orange juice, tomato juice, lemon, etc.) may discolour stainless steel parts if they are not promptly cleaned. Products or parts made of stainless steel used near the sea or in interior fittings of swimming pools require more frequent cleaning to remove chloride deposits and prevent corrosion and chemical attack of the external surface. Stains on stainless steel surfaces must be promptly cleaned. If left for a long time they can become permanent.

To prolong the life of the product, clean the surfaces regularly, dry them with a clean cloth and remove any stagnant water, especially if exposed in locations with a high level of humidity or a marine climate.

When not in use, we recommend storing in sheltered places and covering with waterproof protection. In this case, it is advisable to remove the cover and ventilate the product frequently and regularly to avoid the onset of any mould or stains due to damp.

THE WARRANTY WILL NOT COVER DEFECTS OR IMPERFECTIONS RESULTING FROM THE PASSAGE OF TIME OR TO WEAR AND TEAR DUE TO THE NORMAL USE OF THE PRODUCT.
