

is the only solar powered bottle filler on the market

US made solar modules - provide power and shade

120 MPH - steel solar array structure made in the USA

HD outdoor signage for in-house promotion

Complete cabinet made in the USA

Digital display for bottles saved

Standalone (SA) models use lithium batteries

UV sterilization at the dispenser

US manufactured bottle filler with 5 year warranty

Ground screw anchors offer 120 MPH wind rating, with minimal site damage

Shaded bench option

High efficiency chiller with oversized condenser for hot climates

Vandal resistant construction

ADA compliant
ANSI code compliance
Multiple materials & finishes available

WARRANTIES	
Solar Panels	25 yrs
Lithium Battery	10 yrs
Bottle Filler	5 yrs
Complete System	5 Yrs

SA-1100 with donation plaque

SA-1650 with shaded bench

GT-2200 with media and shaded bench

Standard finishes for beauty and corrosion resistance

Galvanized Steel
Utilitarian and low cost

Stainless Steel
The ultimate in durability

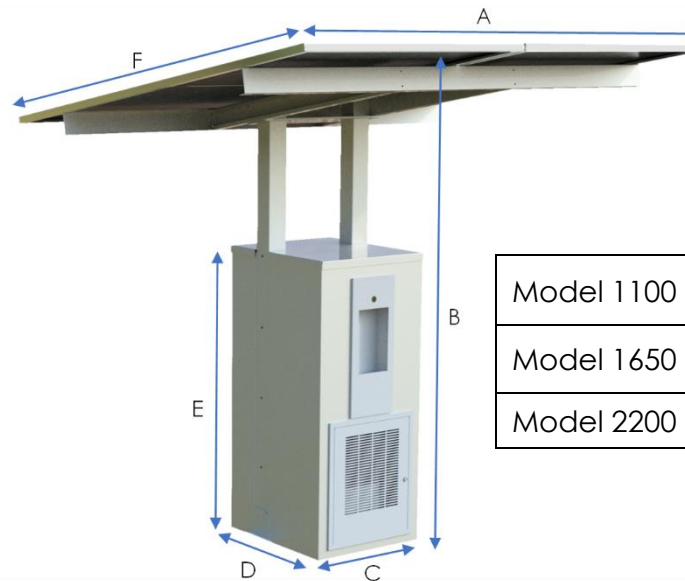

Powder Coated Steel
Wide color selection

Vinyl Wrap
Artistic and attractive

Note: All models are available as stand-alone solar systems with batteries, when no power is available, or as grid tied systems that produce supplemental solar power. With grid tied systems there is no wasted energy, excess electricity is fed back into the grid and there is a lower initial cost compared to battery-equipped systems.

Both types of systems qualify for the 30% ITC, with grid-tied systems also qualifying for state and utility incentives.
