

IMPORTANT. Keep this card in a safe place.

Use the 4-digit PIN CODE to disarm the alarm via the override LED if the factory key is lost or broken.

PIN CODE

EMERGENCY DISARM

1. Unlock the car door with the car's key and enter the vehicle. If the siren sounds turn it off with the siren key (AVS C4/C5).
2. Leave the driver's door open. The bonnet and boot must be shut.
3. Turn the ignition ON.
4. Press the override LED button an equal number of times to the first PIN digit with less than one second between each press.
5. Pause for two seconds, the LED will flash for one second.
6. Repeat steps 4 and 5 for the remaining PIN digits until all four digits have been entered.
7. If the code has been entered correctly the alarm will disarm.

Note: This disarms the AVS alarm. If your car has a factory immobiliser this may prevent the car from being started. In this case contact a locksmith.

If you do not know your PIN please call your installer or refer to www.avscarsecurity.com.
