

DOG RECOVERS FROM COLLAPSED BACK LEG AFTER BACK INJURY

Dear Jan & Graham

Just a note of thanks for your help in healing Heidi. If it wasn't for your help she wouldn't be here today.

She was apparently hit by a car or bike damaging her back which in turn collapsed her back legs, which she started dragging around. The vet said maybe an operation might help (\$3000 +).

I met Jan and Graham through a friend and Jan did some healing with Heidi which made a difference right away. They lent me a Bioptron light which I used on Heidi twice a day — 6 mins. Within the first week on using the light she was starting to stand and look out the car window and walk and drag her back legs about. There was amazing improvement in most days with back legs collapsing now and the . Today she is running, jumping and standing.

For me to see all this is a miracle. Her look, coat and even happiness is apparent. She is so lively. If it wasn't for Jan and Grahams help and the use of the Bioptron light Heidi wouldn't be here.

Regards,
