

DOGS AND PEOPLE

Dear Veterinarians,

Last week Graham O'Gorman called into the SPCA Clinic in Rotorua where I have been doing a locum. He offered to demonstrate Bioptron light therapy to us.

Using the Bioptron light treated four staff members and two dogs. I was very impressed with the results. Also intriguing was the keenness shown by one dog to receive the treatment.

Of the four staff members, only one experienced increased pain at the injury site before making a full recovery.

On the basis of his demonstration I can recommend to you to test the Bioptron you Light for yourselves.

Yours sincerely,

Cara Upsall
SPCA Rotorua
