

HORSE SARCOID ON THE LIP

December 2001 "Blazing" had a Sarcoid the size of a walnut on the side of his upper lip which had gradually grown bigger and the skin on the outside was erupting.

I was told the Bioptron Light would fix it so I bought a small one and use it every day for 8 minutes. It took a while to see any effects but by the end of just over 2 months the sarcoid had completely disappeared and there has been no sign ever since.
