

# DEEP INJURY TO HORSE'S SHOULDER

15th August 2005

To whom it may concern

2 years ago approximately, our Stallion Larkspur Connoisseur had a serious paddock injury whereby he suffered deep injury to his shoulder.

Following this injury it has been a long arduous process to find a remedy to help the healing process of his injury.

Recently we met Mirjana who talked to us about some success horse owners had had using the Bioprtron Light Therapy on their horses. After having only minimal improvement with Connors injury from using previous therapies that were quite stressful to him we decided we would like to see how he reacted to this Light Therapy.

Firstly we were really amazed to see Connor himself choose the colours for use with the Light Therapy and then to see how he reacted with the treatment. He showed signs of complete relaxation and contentment, something Robin and I had not see since his accident. We are confident to continue using this therapy and are looking forward to some rewarding results.
