

# ARTHRITIS PAIN IN THE FINGER GONE

28th February 2020

I Dennis met Fern a sales rep for Zepter NZ at a Field Day (still is a rep for Zepter) in about 2012 and they had a stand. I had pain in my middle finger joint that was paining me for many weeks I think it was arthritis. I took a seat told my story and was kindly advised by Fern that 2 minutes white light of the Compact Bioptron light should stop the pain. I thought this I must see so I said proceed. 2 minutes later the pain was gone, not reduced, but gone and remained gone for many weeks.

So I decided to buy a Compact Bioptron with all the colored lenses , and with many a positive results in 2015 we purchased the Big Pro 1 Bioptron light with all the colored lenses and very recently Feb 2020 purchased the new White lens Fullerene C 60 filter via Fern so I am a happy customer.

Regards Dennis
