

ARTHRITIS OF THE NECK

Oakside Cottage Great South Road Ramarama Drury R.O.3

4 July, 2001

Dear Bioptron team,

Having had very severe arthritis of the neck and head for the last two years and not wanting to resort to drugs prescribed by the doctor and specialist. I decided to go for natural remedies and therapies. I think I tried everything all to no avail. It was agony to try and lay my head on the pillow at night and just as painful to get off it in the mornings. After 12 months of spending a huge amount of money and time getting to and pro from these places I attended, I didn't improve. I cried a lot.

Eventually, I had to take the painkillers and the Voltaren that I tried not to take at the first place. 2 Voltaren a day and 2 Panadine every 4 hours, this also for another year and then I WAS introduced to the Bioptron Light. From the first time I used it, I felt relief and I haven't looked back since using this amazing light. After the first day of using it, I never took one painkiller. After one week I was down to 1 Voltaren a day and that will be reduced to nil very soon.

After playing Golf and Competitive Golf for my club for quite a few years and being made Vice Captain I was devastated to have to resign as I was unable to play or do the duties of the office side. I was unable to hold my head down long enough to write or do cards. This letter is the first thing I have written in 18 months, other than a Greeting Card. This amazing Bioptron Light has made me so well and more mobile than I ever dreamt I would be in only three weeks of using it and I hope that in the not too distant future I shall be able to play Golf again.

My husband and family are astounded and are so happy to have their wife and mother back again, instead of the misery that I had become.

I am just in awe of this wonderful light and so enthused that at the age of 67 I intend to become a Zepter agent and let other people benefit from its healing properties the same as myself. Especially as it not only gave me such relief from the Arthritis but it cleared up a very nasty scaly red patch that had appeared on my face two weeks previously and showed no sign of going. After 5 days of treatment. 4 minutes twice a day, it has gone. Amazing results, amazing Bioptron!

My 4-year-old Granddaughter summed it all up when she said "Nanny, you can bend your head to kiss me now, isn't that good". IT SURE IS!

Yours faithfully,
Audrey Tomlin
