

# POOR CIRCULATION IMPROVED

Hi Christine and Sam, thought you would both be very happy to see the photos of Dads legs. (was about to get amputated) He no longer has to have 3 monthly hospital visits or does he have the District Nurse call. He is off all of those major pain/nerve tablets. He is only on Panadol and his other blood pressure tablets, so all in all he is doing as well as can be expected.

He still has a lot of aching in his lower legs and around his kness, but I try and explain that this is all due to the lack of circulation and it probably wont get much better than what it is. He looks so much better now that his is off those tablets.

I would like to personally thank you both for all the time and patience you put into Dad. I can 100% guarantee we would not be in this position had we not found the Biopton Light.

Once again thanks so much I am so grateful for your help and support.

Regards  
Jenny and Aurther Burt
