

MENIERE'S DISEASE AND FALL

10th July 2007

I used both the small colour lamp and the large lamp for about 10 years. Favour the colour lamp.

For my son-in-law:

Meniere's disease (ex surfer)

The medication caused him to black out on 6 foot deck and roll down sloping section.

Bruised cuts to face, but no broken bones, but concussed

Red lamp to face and healed without deep scarring (just happened so wound still not old but now all healed) Have to look to see the slightest scar.

Headache relieved and now never mentions his Meniere's disease.

After 1st red lamp uses large standard lamp 2 minutes with Oxy Spray each day.
