

HAIR RE-GROWTH

Myself I use a Bioptron B2 4 min each side of head and until regrowth occurs (9 days in my case)

I also used 1 minute of orange on each kidney, left then right.

On a patient I treated for Melanoma (multiple, advanced) that were on the head (scalp). I treated with 1 minute red with Bioptron Pro1 and 1 minute green on scalp and 4 rounds of 2 minutes around head, front to back, left then right.

This man had been bald for 40 years and he had significant regrowth of hair after 2 weeks.

On another I used red and purple 1 minute each as above, then 4 minutes front to back. Great regrowth after 3 weeks. Treated once per week
