

# ENERGY, MOOD, FUNGAL INFECTION AND PRE-CANCER SKIN SPOTS

**As Alternative Health Practitioners for over 16 years in Massage and Healing we immediately resonated with Bioptron Light Therapy.**

We had expressed to our friend Hermione how after both turning 50 we observed that with health issues our bodies weren't bouncing back as quickly as before. She then demonstrated the benefits of Bioptron Light Therapy and we immediately drove to Auckland to purchase a light.

Since November 2008 we have been enjoying using our light daily as a great energy boost. We have followed the colour therapy schedules with excellent results. We are both Aries and usually find daily routines challenging but have noticed the regular discipline of the light is so easy and enjoyable. The process has aided our other health disciplines.

The Discharging and Purging Program was not only effective physically but we also noted some long-term personal emotional relationship issues arose and we could flush them out.

Sam had been dealing with a fungal infection in his toenail for nearly ten years, he spent more than the Bioptron Light cost as well as nearly poisoning him with Lamasil a very nasty drug. Regular Treatment with Bioptron Light has kept the infection in check and is looking much improved.

Christine had small pre-cancer flaky skin spots on her face which an over enthusiastic Doctor had tried to burn off resulting in an indent scar on her nose that was unsightly and when the growth returned as they inevitably do, it looked even worse. 3-4 weeks of Oxy Spray, Bioptron Light and the Multi-generating cream and not only had the growth gone but the tissue regenerated returning her nose to original condition. Now one year later no further growth has occurred.

We were so impressed with our various responses with the light we decided to become full time agents and have Bioptron Light Therapy as part of our massage treatments.
