

INJURY RECOVERY AFTER CAR ACCIDENT

Subject: Injury treatments with Bioptron Pro Light Therapy

To whom it may concern

Rachel Harris of Reperoa was treated for four consecutive days (15-18 March) with Bioptron Light Therapy at the Horse of the Year Show in Hastings.

She received Bioptron Light Therapy Treatment on her stomach scar, knees, right foot and face. Each area was exposed to the therapy for 10 minutes.

After serious injuries sustained from a car accident by the end of each treatment Rachel remarked on how much her knee joints and heel pain were significantly reduced and she felt an overall sense of well-being.

It is recommended that the Bioptron Pro (11cm diameter) be used, given the extent and serious nature of Rachel's injuries.

Bioptron Light Therapy medical devices have proven medical efficacy in treatment of wounds, pain conditions with a significantly shorter healing times.

Developed and produced by Biptron AG in Switzerland, Bioptron Light Therapy devices have been used by medical professionals in hospitals and private surgeries as well as by home users and patients themselves world wide.
