

# **HORSE FELL AND LANDED ON MY LEG**

In the Cross Country phase, my horse tripped on the top of a Jump and fell on landing ending up on my leg. Overnight my ankle became very swollen and painful.

We were told about the Biopton Light Therapy treatment by someone who had a similar accident.

After my first treatment with the Biopton Light the swelling in my ankle had been significantly reduced and movement had become possible. I was even able to put my weight on it which was not possible before the treatment.

I would strongly recommend it to anyone !!!! It really works!!!
