

SINUS INFECTIONS AND ALLERGIES

28" May 2007

Dear Rachel

I write to you today as I sit here enjoying a winter's sunshine free from sinus, thanks to you and your Bioptron light.

After suffering for 12 years from sinus infections as a result of allergies brought on by summer pollens and grasses, and then winter damp, dust, mites and mould, I can now finally enjoy seasons free from pain and misery.

Little did I know how "badly" my condition affected my day-to-day enjoyment of life. I can now enjoy the garden, lay on the lawn, walk the lake's edge, have potted plants in the house, and feather/down duvets on the bed without fear of allergies that would result in sinus infection.

"The Power of Resistance" program in March 2005 followed by hiring your lamp in June/July 2005 and the Compact III in September/October 2005 has changed my life. I am now free from all allergy & sinus symptoms, something traditional medicine failed to achieve.

Rachel, you were a wonderful practitioner of Bioptron Light and I can not thank you enough. Your ability to relate to my discomfort, your empathy and continuing support throughout the treatment was invaluable.

I will be forever grateful.
Thank You.

Yours sincerely

Julie Quirante
