

RICKETS, SCURVY, TRIGGER FINGER AND VARIOUS OTHER CONDITIONS

25th July 2020

Dear George and Nena,

I wish to record the results of my experience with the Bioptron MedAll. The device has done wonders for me and I am grateful to you for bringing it NZ. Some of the ways in which I have used Bioptron with incredible efficiency are:

1. Despite a very healthy diet and plenty of exercise, in March last year I was diagnosed with both rickets and scurvy, which meant incredible pain in most of my body, and considerable disability. With the right supplements, I was slowly recovering. In August I met Fern, who was demonstrating Bioptron, and felt I may have found something that would help my recovery. I was right. After five months of intense pain, I found a high level of relief within weeks and was soon fully recovered, with full movement and comfort in my body.
2. Fern was visiting me in September last year, when I accidentally scalded my hand. My thought was A & E. Fern's thought was to grab the Bioptron and give me a treatment. Within minutes, there was complete comfort, no redness, and no follow up of any medical treatment needed.
3. A month ago I developed a trigger finger. I used the light twice a day and could see improvement within days. I'm continuing the light treatment and there is a total absence of pain and stiffness.
4. Over the time I have owned the light, I have treated family and friends with coughs, colds, sore throats, scrapes and grazes, emotional stress - amongst a long list of other issues, with great success.

I can't say strongly enough, that I find Bioptron the most amazing device I could have, for taking care of health and wellbeing, for myself and for the people with whom I share its incredible technology. Knowing it is totally safe brings peace of mind in using it on a regular basis for all manner of issues. Equally wonderful is using it to help prevent future problems.

Thank you and with all good wishes,

Warm regards,

Evelyn Manley
