

FACE LIFTING, FACIAL AND REDUCE OF LINES

The Bioptron Light combined with a facial is a most wonderful experience. The light not only causes the creams applied to the face to have more efficacy, but it also causes lines to become less visible. The general tone and quality of the skin becomes softer, younger and more nourished. The light gives the added bonus of enhancing a general feeling of wellbeing and uplifting the spirits and the skin. It is a highly recommended experience.

Sincerely,

Barbara Callan
