

# HALF FACE TREATMENT COMPARISON

I received my first information about Bioptron Light and Colour Treatments in March, this year. I found the information about face lifting unbelievable and because of that I decided to have just half of my face treated and leave the other side as the control sample without light. The treatments were in conjunction with the Oxy-Spray, Bioptron B2. lifting serum, and hydro lifting cream 2-3 times a week. At home, I did not use any of these or any other cosmetic product. After the 5th treatment, the change was clearly visible on the side of my face, that was being treated, in comparison to the untreated side. On the treated side: two deep wrinkles on my forehead completely disappeared, my eyebrow was higher my eye was more open, and the angle of my lips greater. Since I was satisfied with the results, I started to believe in Bioptron and decided to commence with the treatment of the other side of my face.

I sincerely recommend the Bioptron light treatments and Swissological cosmetics to anyone who cares about their looks and wishes to have a face with fewer wrinkles and a younger look.

Yours sincerely,

Valma Miller
