

BURN TO THE BONE AND MELANOMA SCAR FROM 3 OPERATIONS

Dear George,

Zelda came for Light Treatment and was very happy. Her knee is almost completely healed only a half cm square gap to fill. We cannot attribute it all to the Biopton because she also has a Chinese magnetic heater that she has used with Oxy Spray between sessions here. However we know and believe that BIOPTRO did it!!

She went to the skin specialist and was amazed and couldn't stop laughing. He said "I had you booked in for skin graft - there was NO WAY that could heal! Whatever you are doing keep doing it. it works!!"

What amazed me was when I said "I HOPE YOU TOLD HIM". She said "He didn't want to know". Are you tearing your hair out? I AM!! Can you believe it.

Anyway - several Doctors and friend Know So... its getting about!

LOVE,
ROSEMARY
