

CELLULITE AROUND THIGHS AND LEGS

3 November 2000

To whom it may concern

Although I am slim, for the past four years I have had a problem with cellulite around my thighs and legs, I felt embarrassed wearing my bikini. I exercised, watched my diet, and did all the right things - to no avail. After researching what causes cellulite and discovering there was "no real cure" other than what I had been doing I felt I would be stuck with it for good.

By chance I came across the Bioptron Light Therapy together with cellulite massage at the Spine & Body Clinic in Henderson. At first I was skeptical - it seemed too easy - especially after years of hard workouts and no results...

4 months later my cellulite has nearly disappeared - I feel like I discovered gold - my confidence is restored and I'm ecstatic with the results - If you have cellulite you have to try the Bioptron - it does work.
