

BAD CAT SCRATCH HEALING

10th July 2007

I used both the small colour lamp and the large lamp for about 10 years. Favour the colour lamp.

For my daughter, the cat accidentally scratched her nose and cheek. The next morning her face was painful, pussy reddened and weeping.

The doctor's medication caused a large blister to form.

20 minutes with red and the pain was relieved. And the next morning the blister was marginalized. Within 5 days just a slight scar could be seen.

Now completely healed without any scar.

Watched closely by the rest of the office who could not believe what the magic lamp did (used the large standard lamp and Oxy Spray 2 minutes each day after the initial small lamp treatment)
