

# OPERATION WOUND HEALED FAST

Zepter New Zealand  
Attn: George.

May 05

To whom it concerns,

I purchased a Bioptron Colour Therapy light last year. (September)

I'd just like to tell others about how great it is.

I used it on my son who had an operation which was in a place that would be hard to heal. I used the Bioptron light plus the blue and purple colour therapy on him for 4 times a day for five weeks, he had no bruising. The pain was kept to a low level and the healing of the area was really good.

We had such great results, that even the surgeon had said, he had healed up really well. I had told him what I'd be doing and he said that the operation my son had had can take months to heal.

So glad I purchased the Bioptron light from Cynthia.

I have a sister who has one as well. She told me all about it.

Regards,

Napier
