

CHEST AND THROAT

I've had the light for over 15 years I think and hadn't used it for a wee while but I'm very enthusiastic about doing some of the treatments as I remember what a difference they made in the past.

My husband has been using it recently for his throat. He talks all day in consults and sometimes his voice gets raspy so he's finding the orange light on his throat is helping. He's also using white light on the outside of his neck, throat and chest and it's making a difference.
