

TOOTHACHE CAUSED BY SINUS INFECTION

Thank you George and Nena.

I have a personal testimonial for you:

Severe toothache started a bout a week ago

I remembered buried deeply in my brain storage system that the Light could help with toothache.

That is what I did and within 24hours the pain was gone.

Apparently a lingering Sinus Infection proofed to be the root cause of the problem
The pain has gone and saved me a visit to the dentist.

My GP confirmed also the link between the tooth-ache and head cold

Regards and keep safe.
