## Door Furniture & Lock Guide

Tradco offers a wide range of door furniture options.

### Latch

This is used when the door doesn't need to be locked. It can be used with any type of door furniture, whether it's long back plate<sup>1</sup>, short back plate<sup>2</sup>, lever<sup>3</sup>, or knob<sup>4</sup> on rose. Latch simply means you need a Tube Latch<sup>5</sup> to make your door furniture functional.

Tube Latch with 9586 Victorian Round Rose in Matt Black

### Euro

These are high security locks used on external doors (any door that leads to the outside of a building). They are suitable with any of our door furniture which has an 'E' (for Euro) in the description. A Euro Lock<sup>6</sup> then requires a Euro Cylinder. You can choose either a double-ended cylinder<sup>7</sup> (where a key can be used from either end) or a thumb-turn cylinder<sup>8</sup> (key for outside, thumb turn inside). Euro Cylinders can be supplied keyed-alike (where the one key can open all matching locks), and are easily rekeyed by Locksmiths.

6130 Euro Cylinder Key/Key 5 Pin in Satin Brass, 4048 Mortice Lock Euro Sat in Brass CTC47.5mm Backset 57mm, 6637E Menton Lever on Long Backplate in Satin Brass.

### Skeleton Key Locks

These can be 5 Lever High Security Locks, to be used on external doors, or 3 Lever Low Security Locks to be used on internal doors. The difference between 5 Lever and 3 Lever Locks is the number of different key combinations available. 5 Lever Locks also have an 'anti pick curtain', which makes it harder to access the working components in the lock once fitted inside your door, in addition to reinforced steel pins through the locking bolt. They are suitable with any of our door furniture labelled 'Lock' in the description. These locks are supplied with a 'skeleton' key<sup>9</sup>. 5 Lever Locks have the same level of Security as Euro Locks. The main difference is that the 3 and 5 Lever Locks are more 'traditional' for period homes. These locks can be supplied keyed alike.

## Door Furniture & Lock Guide

### Rebated Locks

These are used when you have one door closing into another door, also referred to as 'French Doors' (as opposed to a door in a 'standard' door frame). Tradco's rebated locks have a 13mm rebate in the face plate and striker. Rebated locks are available in Euro Lock, Skeleton Key Lock or you can use a Rebate Kit<sup>10</sup> on a Tube Latch.

### Privacy Locks

These locks can be used on Bedroom or Bathroom Doors. They have a thumb turn one side and a safety release on the other<sup>11</sup>. All Door Furniture with a 'P' (for 'Privacy') in the description are suitable for this application.

### Rim Locks

These are low security locks that screw to the outer surface of the door (as opposed to a mortice lock, which is 'morticed' inside the door). Rim Locks require the use of mortice knobs with a threaded spindle, whereby the knob screws onto the threaded spindle and is secured by grub screws. This is because you are relying on the knob being held in place against the Rim Lock surface (you can't attach a knob on a backplate to the surface of a Rim Lock with screws). You will also require an Escutcheon<sup>12</sup> to cover up the hole for the key on the other side of the door. Rim locks are suitable for inward opening doors only and are not suitable for rebated doors.
