## Colors, textures, finishes headline Sunpan's introductions this fall

Vicky Jarrett // Managing Editor // October 13, 2023

HIGH POINT – Global furniture company **Sunpan** is adding new colors, textures and finishes for its introductions at this week's High Point Market.

"This market is all about soft and tactile designs that add warmth and comfort to any space," said Fionn Ho, director of product development at Sunpan. "In terms of color palette, warm earthy tones continue to be strong in this market."

Examples include:

- The Herriot Coffee Table, in a recently introduced summer sand finish, mimics a timber wood grain through concrete, ultimately using one material to portray multiple textures.
- The new Alanya Dining Table and Mojave Collection feature dynamic ripple and fold-like details belying the solid material.
- The brand-new Caspian Sofa and Laken Sofa Chaise both feature a soft yet knotty boucle fabric that boosts comfort with cloud-like cushioning.

Also, Sunpan is introducing a new leather colorway, Sahara Sand, which is showcased on its Tryor lounge chair and Tadeo swivel lounge chair. The company also is expanding its leather line with introductions in camel and cognac, such as the Ira sofa and Trine lounge chair in camel leather and the Anakin sofa and Kalla dining chair in cognac leather.

Other introductions at this market include artisan-crafted products that are purposefully built for a lived-in or aged look: the new Lathan lounge chair and the Zanatta collection, with hammered metal surfaces that give a geometric textural feel; the Auburn sideboard, featuring patina-finished doors to mimic the natural effect of time; and the Corina collection features hand carved, etch-patterned surfaces.

Sunpan's showroom is open to registered designers and buyers from 8 a.m. to 7 p.m., Oct. 14-18. The showroom is located at Showplace, space 1200.
