Let's be honest: The side table is the unsung hero of the furniture world. Serving not only as catchalls for remotes, cups, magazines, [insert random table-top object here], they are also decorative power players in any room, adding just the right color or texture to a small space. From sculptural tables with soft waterfall edges to hardy wood stools that double as seating for that extra guest that crashed your dinner party, the range of side table designs out there is endless. And the fun doesn't stop with the variety of shapes; different materials can add that extra textural note you need in your living room, entryway, or even bathroom! From Hay's granite-based Bowler table to a horseshoe-shaped dream from CB2, we've handpicked some killer side tables to cure all of your where-can-I-park-my-wine-glass-while-watching-*Love Island* woes. Whether you're a minimalist who prefers a timeless design or a hoarder (*cough cough* like us *cough cough*) who needs yet another junk drawer, we've sourced the perfect table for you.
