

FerMonster!

The World's Biggest Wide-Mouth Carboy

The FerMonster is better than traditional carboys in the following ways.

Easy to clean

Unlike most carboys, ours have smooth, ribless sides and a 4" wide mouth to reduce the residual yeast and sediment. This makes cleaning simple.

Easy to fill

The wide mouth opening reduces spillage and the need for additional equipment.

Easy to measure.

Brilliantly clear with built-in 5-Gallon and 6-Gallon markers on the side for your convenience.

Note: the FerMonster (XL) has a built-in 7-Gallon marker.

Best of all – it's built right

It has enough capacity to use for primary fermentation as well as secondary.

The FerMonster comes in two sizes: 6-Gallon (23 L) and 7-Gallon (27 L).

The lid is constructed as one piece, providing a perfect, airtight seal.

Made with food-grade materials & BPA-free.

If you want to store your FerMonster, we also have a solid lid that you can use for safekeeping (not included) so that dust does not settle inside. Or, if you need a custom lid, you can alter the solid lid to fit your needs by adding more holes.
