

AIH Belgian Dubbel

This is a full flavored beer. The candi sugar with the specialty grains will give a nice toasted, raisin profile to this beer. Packed with tons of flavor these beer is sure to please.

k99-2905

Original Gravity : 1.061 **IBUs :** 18
Final Gravity : 1.017 **Alcohol by volume :** 5.90%
Color : Amber **Difficulty :** Easy

Supplies Included : LME, Specialty Grains w/bag & Hops

Brew Day

/ /

Ingredients Included :

Fermentables : 7 Lbs. Pale Liquid Malt Extract 1 Lb Clear Candi Sugar (Last 5 minutes of Boil)		Specialty Grains : 8 oz Aromatic 8 oz Biscuit 4 oz Special B 4 oz Caramunich	
Additives:			
Boil/Bittering Hops :	Flavor Hops:	Aroma Hops :	Knock - Out Hops :
4 HBU Pack		1 oz Hallertau Mittelfruh	
		Suggested Yeast : White Labs 530 Abbey Ale, Wyeast 1214 Belgian Ale, Safbrew T-58	
		Dry Hops :	

Procedure : Please read all the instructions before you begin brewing, to ensure you have all the ingredients, and you fully understand the process.

We use ale yeast with this, so it's more accessible to the extract brewer.

- Sanitation :** It is important to thoroughly clean and sanitize all of your brewing equipment.
- Making the Wort :** Begin by heating 2.5 gallons of water in your Brew Pot. While the water is heating, place your "Specialty Grains", which should be crushed, into a "Grain Bag". Tie a knot at one end of the "Grain Bag" leaving room for the grains to be loose in the bag. When the water reaches a temperature of 150° to 160°F (max temp.), place the "Grain Bag" into your Brew Pot. Steep your grains at this temperature for 20 minutes. After 20 minutes, remove the "Grain Bag" from the pot. Do not squeeze the bag, just let the liquid drain from the bag into the pot. The water is now "Wort" at this point.
- Boiling the Wort :** Bring the "Wort" to a boil. It should be a rolling boil, be careful to avoid a "Boil Over". Remove the "Wort" from the heat. Add all of the included "Fermentables" to the "Wort". Stir the "Fermentables" into the "Wort" until it has all dissolved, making sure none of it is sitting on the bottom of the pot. Return the Brew Pot to heat and return the "Wort" to a boil.
- Boil Hops :** If using "Hop Bags", put the Boil Hops into a "Hop Bag" and tie loosely at one end. Add these to the boiling "Wort". You have now added the Bittering Hops. Continue to Boil this for 55 minutes.
- Aroma Hops / Candi Sugar :** Follow same instructions for "Hop Bags" as step 4. After 55 minutes of boiling, add the Aroma Hops to the boil. Add Candi Sugar at this time making sure to stir to dissolve throughly. Continue to Boil for 5 minutes.
- Boil Termination :** After 5 minutes (60 total minutes), remove heat source from the Brew Pot. Now it is time to cool the "Wort" to 70°F. This can be accomplished by using a "Wort Chiller".
- Add Water :** Siphon your cooled "Wort" from the brew pot into your fermenter. Be careful not to transfer heavy sediment from the brew pot into the fermenter. Add enough water to bring the Wort to 5 gallons. Stir the 5 gallons of "Wort". At this time, take a Hydrometer reading to record the Original Gravity.
- Begin Fermentation:** Add the yeast to the "Wort" surface. Firmly secure your fermenter lid and add the airlock. The ideal temperature for fermentation is 64° - 72°F. The "Wort" will begin to ferment within 24 hours. When fermentation is complete, take another hydrometer reading to record the Final Gravity.
- Secondary** Rack beer into a clean and sanitized secondary fermenter. Leave for another week. If using single stage fermentation leave in primary fermenter another week.
- Fermentation Finish** When fermentation is complete, Bottle or Keg Your Beer, following appropriate procedures.
