A Thank-You To Our Sponsor

Formed by enthusiasts and collectors, Blue Blanket is one of the very few Italian artisan makers combining Japanese and American fabrics with ingenious Italian manufacturing. To produce a book of this quality and depth not only costs money but also needs a partnership in which both parties have a bond of trust. Blue Blanket provided exemplary support in the look and scope of the book and offered their expertise on knowledge of cars and motorcycles – which is extensive. In return we are very happy to be able to feature their clothing in these last pages as we pay homage to the Ford Model T and match Blue Blanket's current range with the American West of the pre-First World War epoch.
