

Fudge Kitchen

Toast Your Taste Buds

Fill your favourite mug with cold milk or non-dairy equivalent and microwave it for approx. 1 minute (hot, not boiling). Add your sachet of Drinking Fudge and stir or whisk thoroughly with a hand frother until the fudge sauce and the milk have blended together. Return your mug to the microwave for about another 30-45 seconds, make sure it's not too hot to drink, then simply sit back and enjoy your devilishly different Drinking Fudge.

Melt Into Indulgence

Fill a glass with ice, milk/ non-dairy equivalent and a splash of cream (optional), add to blender with a sachet of Drinking Fudge and blend to create a delicious smoothie. Pour into your favourite glass and enjoy your refreshing Drinking Fudge. (To create a milkshake, omit the ice and just add milk. For a creamier taste, add ice cream instead of ice). Fun things to add: Dessert spoon of peanut butter, chopped banana, splash of rum, shot of espresso...

You are 2 minutes away from fudge heaven!

From winter warmer, stirred into hot milk, to a summer frappé mixed with ice cold milk, an indulgent milkshake swirled with ice cream, or a fruit smoothie steeped with pulped fruit and crushed ice... the only limit is your imagination...
