# Greens Varieties

# Astro Arugula

Early, heat tolerant.

A selection of standard arugula. Leaves are less deeply lobed and exhibit a more strap-leaf shape.

- Edible Flowers: Harvest the white flowers with dark-pink veins as they appear. Sprinkle them over salads or add to vegetable stir-fries. Flavor is spicy and nutty. Popular choice for brightening up salad mixes.

Seed Source: Johnnys Selected Seeds

# Prize Bok Choy

Elegant vase-like shape, medium thick white stems and smooth, mild flavor.

The best open-pollinated full sized pac choy we have seen in our trials! Prefers cool weather, but is slow to bolt in heat. We have hand-selected our strain for uniformity, vigor and bolt resistance. For early spring or fall planting. 14,000 seeds/oz.

- Vigorous
- Slow to bolt
- Open-Pollinated

Seed Source: High Mowing Organic Seeds

# Green Wave Mustard Greens

Bright green, broad leaves with a tightly scalloped margin and hot, mustardy flavor. Plant densely so leaves remain a proper size for baby leaf and petioles elongate for easy harvest. AAS winner. USDA Certified Organic.

Seed Source: Johnnys Selected Seeds

# Ruby Streaks Mustard Greens

Intricately lobed dark green and maroon leaves.

Fine, deeply incised leaves. The color ranges from dark green with red veins to dark maroon, with the maroon color darker when grown without row cover and in cooler weather. The flavor is mild and slightly pungent.

Seed Source: Johnny's Selected Seeds

# Miz America Mustard Greens

Exceptionally dark red, deeply lobed leaves.

Delicate, toothed leaves are dark red on both sides for a striking addition to salad mixes. Uniform leaf size and shape, with a mild flavor.

Seed Source: Johnnys Selected Seeds

# Champion Collards

Selected to hold in the field up to two weeks longer than other varieties for an extended harvest.

Rich blue-green cabbage-like leaves. Plants are bolt resistant, productive and hardy. Waxy leaf surface provides natural protection from cabbage worms.

- Improved Vates-type
- 24-36" tall
- Compact habit
- Open-Pollinated

Seed Source: High Mowing Organic Seeds

# Winterbor Kale

Standard green curly kale.

Plants are tall, with excellent yield and good cold hardiness. The ruffled, blue-green leaves have an attractive curl. Vigorous plants will continue growing to produce leaves for successive harvests as the lower leaves are harvested.

Seed Source: Johnnys Selected Seeds

# Redbor Kale

Frilly deep purple-red leaves.

Similar to Winterbor in everything but color. For garnishing and eating. Flavor, color, and curling are enhanced by cold weather.

Seed Source: Johnnys Selected Seeds

# Black Magic Kale

Highly uniform for full-size production.

Black Magic is a well-maintained selection of Toscano kale with long, narrow leaves for attractive and tall, straight bunches. Dark blue-green leaves with beautiful savoy. Lacinato or "dinosaur" type kale.

Seed Source: Johnnys Selected Seeds

# Red Russian Kale

Smooth, green, purple-veined leaves for baby leaf and bunching.

Stems are purple; leaves are flat and toothed with purple veins. Mature plants are medium-tall and leaves are tender compared to other kales. For salads and light cooking.

Seed Source: Johnnys Selected Seeds

# Coastal Star Romaine

A longtime favorite.

The large, heavy heads are dark green. Heat tolerant. Suitable for marketing as full heads or romaine hearts. Good, sweet flavor. Utility Patent granted. Intermediate resistance to corky root. MTO-30. Also available with NOP-compliant pelleting. USDA Certified Organic.

Seed Source: Johnnys Selected Seeds

# Gem Lettuce

Three irresistible mini bibb varieties for home and market gardens.

All three varieties form uniform and dense, “true mini” heads, meaning they fill out and are nicely proportional at the mini stage. They also span a range of colors that create a dynamic contrast when combined. Bibb lettuces are known for their excellent eating quality, and these varieties are no exception, each possessing exceptionally sweet flavor and tender texture.

Seed Source: Johnnys Selected Seeds

# Spring Mix

A customer favorite at the farm, we decided to offer a mix of Salanova lettuce varieties. Grow your own DUG spring mix at home!

Seed Source: Johnnys Selected Seeds

# Muir Head Lettuce

The most heat tolerant lettuce. Organic seed.

Muir is an extremely heat tolerant variety and was the slowest to bolt in our summer trials. Technically a Batavian type, the light green, extra-wavy leaves form dense heads at a small size and can be harvested as a mini or left to bulk up into large, heavy, full-size heads. The leaves are crisp and have excellent flavor. Suitable for hydroponic systems.

Seed Source: Johnnys Selected Seeds

# Cherokee Head Lettuce

Dark red leaves for mini-head or full-size production.

Thick, crisp, dark red leaves with good flavor. Similar appearance to Magenta except much darker red color, though not quite as sweet. Very slow bolting with excellent tolerance to heat and bottom rot. High resistance to downy mildew races EU 16, 21, 23, 32; US 5-6.

Seed Source: Johnnys Selected Seeds

# Bloomsdale Spinach

Open-pollinated savoy for spring and fall.

Medium-dark green leaves on upright plants make Bloomsdale easy to harvest. Heavily savoyed. Suited for early spring and fall plantings as it is fast growing. For full size and bunching. Great flavor.

Seed Source: Johnnys Selected Seeds

# Space Spinach

Tried-and-true variety for all seasons.

Fast growing, medium-green leaves are smooth to slightly savoyed. High resistance to downy mildew

Seed Source: Johnnys Selected Seeds

# Red Tabby Spinach

Red-veined spinach for spring and summer.

Dark green leaves, bright red veins, and an angular leaf shape create a striking combination. Upright habit and uniform growth for effortless harvest at any growth stage. High resistance to downy mildew

Seed Source: Johnnys Selected Seeds

# Bright Lights Chard

The gold standard for multicolored Swiss chard.

Nicely savoyed and glossy green or bronze leaves with stems of many colors including gold, pink, orange, purple, red, and white with bright, pastel, and multicolored variations. The flavor is milder than ordinary chard, with each color a bit different. Direct seed or grow from transplant which allows separating out the individual colors. Consistent growth rate, leaf shape and texture, and strong bolt resistance across all colors makes this a superior mix. Suitable for production year-round, but somewhat less frost hardy than other chards. AAS winner.

Seed Source: Johnnys Selected Seeds

# Pea & Bean Varities

# Provider Beans

Earliest to market.

Provider can be planted earlier than other beans because it germinates well in cool soils. Compact plants are easy to grow and adaptable to diverse soil and climate conditions. Produces 5-5 1/2" fleshy round pod green beans. High resistance to bean mosaic virus and powdery mildew. Purple seeds. Bush bean. USDA Certified Organic.

Seed Source: Johnnys Selected Seeds

# Trilogy Mix

Exclusive! A delightful mix of green, yellow and purple bush beans.

This mix of Provider, Royal Burgundy and Rocdor is perfect for the gardener with limited space. NOTE: Provider will mature first, followed by Rocdor, and then Royal Burgundy. Bush bean. USDA Certified Organic.

Seed Source: Johnnys Selected Seeds

# Premium Shelling Pea

A classic main-crop pea with slim, densely packed pointed pods.

High yielding variety with plenty of pods for easy harvesting. Each pod is filled with up to eleven delicious peas. Plants are 24-30" tall. Peas are excellent for freezing.

- Excellent for freezing
- 4-5" pods
- Open-Pollinated

Seed Source: High Mowing Organic Seeds

# Cascadia Snap Pea

A must-have main season variety with heavy yields of juicy, thick-walled pods.

Bucketloads of plump pods with tiny, distinctively delicious peas on 3' tall vines.

Multiple disease resistances allow for spring and late season plantings.

- Spring or fall crop
- 3" pods
- Open-Pollinated

Seed Source: High Mowing Organic Seeds

# Sugar Ann Snap Peas

Uniform crops of delicious, 2–2 1/2" long peas. Maturity is exceptionally early, with a concentrated set on 20" dwarf vines with 1 to 2 pods per node. Remove string from pods before cooking. AAS winner.

Seed Source: Johnnys Selected Seeds

# Seychelles Pole Bean

A prolific producer of perfect quality stringless pods with an archipelago of tender, small seeds inside each.

Seychelles is an All-America Selections winner with plenty to offer pole bean-lovers: vigorous plants produce dark green, round pods that drop in clusters of six on a loose hanging truss for an easy and continuous harvest. Great flavor and all-around high performance won our hearts. Vines will reach 5' tall and require initial training to climb a trellis.

- AAS winner
- Stringless
- 5-6" pods
- Open-Pollinated

Seed Source: High Mowing Organic Seeds

A top-down view of several sliced cucumbers on a wooden cutting board. The slices are arranged in a cluster on the right side of the frame, showing the internal structure with seeds and a central core. The wooden board has a prominent grain and some scratches. The text 'Cucumber Varieties' is centered in the lower half of the image.

# Cucumber Varieties

# Spacemaster

- Excellent taste in a limited space
- Compact plant, perfect for slicing
- Excellent taste
- Prefers full sun exposure
- Bush Variety

Seed Source: Eden Brothers

# H-19 Little Leaf

Reliable yields on a uniquely compact plant. Blocky, medium-length (3–5") fruits are good for fresh eating. They pickle well and have a distinctive, bright emerald green color. Vines are compact, multibranching, and yield well even under stress. Half normal-sized leaves. White spines. Parthenocarpic. High resistance to anthracnose, angular leaf spot, bacterial wilt, and scab; and intermediate resistance to cucumber mosaic virus and powdery mildew. USDA Certified Organic.

Seed Source: Johnnys Selected Seeds

# Marketmore 76

- Marketmore 76 remains the most widely-planted open-pollinated slicer in the US!
- Dark green fruits stay green and mild-tasting even under heat stress, while multiple disease resistances keep plants vigorous and highly productive across a long picking season. Showed good resistance to angular leaf spot and anthracnose in our trials.
- Vigorous
- Monoecious
- 8-9" fruit
- Open-Pollinated

Seed Source: High Mowing Organic Seeds

# Lemon

Specialty variety prized by chefs for its delicate flavor and crunchy bite.

Round fruits turn from pale greenish yellow to lemon yellow (the best eating stage) and then bright golden yellow (when it most closely resembles a lemon). Easy to grow; does well in short seasons.

- Great container variety
- Tolerates cool weather
- Monoecious
- 3" fruits
- Heirloom

Seed Source: High Mowing Organic Seeds

# Bush Champion

Great for containers and raised beds. Huge 8 to 12" cukes. You won't believe the large number of crisp, bright green slicers you'll get from the pint-sized plants. Mosaic resistant and productive. Proven tops for productivity, flavor and wide adaptability.

Seed Source: Eden Brothers Seeds

# Double Yield

- Harvest regularly for continuous summer growth
- Heirloom, Open Pollinated Seed
- Easy to grow, high yield cucumber
- Prefers full sun exposure

Seed Source: Eden Brothers Seeds

# Homemade Pickles

- Heirloom variety shaped to fit into jars perfectly
- Compact plant produces delicious organic pickling cucumbers
- Easy to grow
- Prefers full sun exposure

Seed Source: Eden Brothers Seeds

## Early Prince Hybrid

This commercial cucumber was developed for early maturity, strong disease resistance, and high yield potential. The 7 to 8 inch dark green fruit are smooth and attractive. Resistance includes anthracnose, scab, and cucumber mosaic virus. The vigorous plants offer multiple picks, and the gynoecious fruiting quality offers greater yield potential because of the increased percentage of female flowers.

Seed Source: Tomato Growers Supply Co.

# Mexican Sour Gherkin

- A unique specialty cucumber.
- Cute, 1" long fruits look like miniature watermelons and taste like cucumbers with tangy citrus overtones. Vines start growing slowly but can get up to 10' long. Can be eaten fresh or pickled. Fruits can be sold in half-pint or clamshell containers at markets that appreciate novelty. Also known as the Cucamelon and mouse melon. Not particularly high yielding. Trellising recommended. NOTE: We recommend harvesting these cucumbers promptly as they tend to get seedy if allowed to grow longer than 1"

Seed Source: Johnnys Selected Seeds

# Zucchini Varieties

# Y Star Patty Pan

Yellow organic patty pan.

Prolific yielder of shiny, yellow, scalloped squash fruits, with light green on the blossom end. Amount of green may vary depending on the level of heat and plant stress. Widely adaptable. Open plant for easy harvest. USDA Certified Organic.

Seed Source: Johnnys Selected Seeds

# Yellowfin

Organic yellow zucchini with powdery mildew resistance.

Uniform, cylindrical fruits; attractive golden-yellow color. Semi-open plants with moderate spines. Intermediate resistance to cucumber mosaic virus and powdery mildew. USDA Certified Organic.

Seed Source: Johnnys Selected Seeds

# Dunja Hybrid

Organic, early, powdery mildew resistant.

A high yielder of dark-green, straight zucchinis. Open plants and short spines make for an easy harvest. Sets fruit well with minimal pollinator activity, making Dunja a good choice for tunnel production.

Intermediate resistance to powdery mildew, papaya ringspot virus, watermelon mosaic virus, and zucchini yellow mosaic virus. USDA Certified Organic.

Seed Source: Tomato Growers Supply Co.

# Costata RomenESCO

Wins every taste test with its unique, slightly nutty flavor and exceptional texture.

Italian heirloom with tender, gray-green skin and prominent ribbing that give this variety a distinctive appearance. Pick at 6" or smaller and fry whole with the flower still attached.

- Gourmet variety
- Harvest at 6"
- Semi-bush habit
- Heirloom

Seed Source: High Mowing Organic Seeds

# Zephyr

Unique appearance and great flavor. Distinctive, slender fruits are yellow with faint white stripes and light-green blossom ends. Harvest young at 4-6" for unusually delicious, nutty flavor and firm texture. Vigorous, high-yielding plants. NOTE: Under certain stressful situations, such as hot weather, Zephyr fruits can show some variability in the amount of green at the blossom ends. In addition, sometimes the first one or two fruits produced can be green-striped.

- Edible Flowers: Blossoms bear a mild, squash-like flavor and are great stuffed and fried, or sliced for use in soups, omelets, salads, and pasta dishes.

Seed Source: Johnnys Selected Seeds

# Spineless Beauty

Hybrid. Some zucchini varieties have spines that scratch your arms as you try to harvest the fruit. Not Spineless Beauty. Picking will be a breeze, and yields are impressive. The vigorous vines and proven adaptation will help you have the success that so many gardeners have enjoyed when growing Spineless Beauty. The dark green fruit are best harvested before they reach 8 ½ inches in length.

Seed Source: Tomato Growers Supply Co.

# Pumpkin Varieties

# Champion

Big jack-o'-lantern with early maturity.

Typically 30 lb. or more, well ribbed, with thick, medium length handle with an upright shape. Vigorous medium vines. Our thanks to the University of New Hampshire for working with us to develop this variety.

Seed Source: Johnnys Selected Seeds

# Renegade

A reliable producer in an essential size class (medium-large, 40–50 bin count).

Striking, rich orange, avg. 14–18 lb. fruits are thick-walled and blocky round. Robust handle, strong PMR, and a medium vine. Consistently high marketable yields and very few culls. Ideal for wholesale and roadside stands. Bred by Dr. Brent Loy of UNH. Intermediate resistance to powdery mildew.

Seed Source: Johnnys Selected Seeds

# Casperita

Selected for productivity, shape, and color.

Ideal for pick-your-own operations, fall markets, and home decoration. This mini, 1/2–1 lb., white pumpkin has strong handles and holds its color well. Intermediate resistance to powdery mildew and watermelon mosaic virus.

Seed Source: Johnnys Selected Seeds

# Moonshine

Wonderful small-medium, white pumpkin.

Very uniform, smooth-skinned pumpkins avg. 8–12 lb. Perfect for decorating or carving. Long, dark green handles. Combine it with Kakai, Sunlight PMR, and Orange Smoothie for a great display

Seed Source: Johnnys Selected Seeds

# Jack Be Little

Big fun comes in a very small package for kids and pumpkin-lovers far and wide. Miniature, old-fashioned pumpkins are 3" wide by 2" tall and bright orange. Each plant will produce an average of eight pumpkins. Great for decorations and raw fruit can be hollowed out to make a cute serving dish.

- 6-12 fruits per vine
- Vining habit
- Open-Pollinated

Seed Source: High Mowing Organic Seeds

# Cinderella

The bright scarlet French pumpkin. Known as Rouge vif d'Etampes in France. "Rouge vif" means "vivid red." This is an attractive variety for fall display. Shaped flat, looking like a red cheese wheel, the fruits average 10–15 lb. The moderately sweet, orange flesh is excellent for pies.

Seed Source: Johnnys Selected Seeds

# New England Pie

The classic New England pie pumpkin.

Dark orange-skinned pumpkins in a range of small sizes, typically 4–6 lb. Although not as sweet as squash, the well-colored, orange flesh is relatively starchy, dry, and stringless. A well-known mini jack-o'-lantern type for pies. USDA Certified Organic.

Seed Source: Johnnys Selected Seeds

# Winter Squash Varieties

# Honey Bear Acorn

Delicious small acorn.

Just right for single servings when halved. Worthy of marketing by name. Semibush plant. Bred by Dr. Brent Loy at UNH to fulfill his career-long ambition to improve acorn squash flavor. Intermediate resistance to powdery mildew.

Seed Source: Johnnys Selected Seeds

# Waltham Butternut

Still the benchmark for large butternuts.

Larger fruits with small seed cavities and thick, straight, cylindrical necks. Flesh has smooth texture and sweet flavor, particularly after 2 months of storage. This 1970 All-America Selections winner from Massachusetts is still deservedly the most widely grown, full-size OP butternut.

Seed Source: Johnnys Selected Seeds

# Bush Delicata

Compact, tidy plants with sweet, oblong fruits.

Delicious smooth, nutty flesh with hints of butter and brown sugar. Skin starts creamy white with green stripes and flecks, curing to striped light yellow. Compact plants spread only 4-6 feet. All-America Selection (AAS) winner bred by Molly Jahn and George Moriarty at Cornell University.

- Semi-vining habit
- 1.5-2 lbs
- AAS Winner
- PVP
- Open-Pollinated

Seed Source: High Mowing Organic Seeds

# Honeynut

Adorable, serving size mini butternut with dark tan skin and great sweet flavor.

Delectable squash is smaller than Ponca with more uniform butternut shape. Green unripe fruits; early planting is recommended for tan color. Field resistance to powdery mildew. Developed by the Vegetable Breeding Institute at Cornell University.

- Stores well
- .5-1 lb
- BR
- Vining habit
- Open-Pollinated

Seed Source: High Mowing Organic Seeds

# Burgess Buttercup

Dark green fruits with golden orange, stringless flesh and sweet, rich flavor.

A long-time New England favorite! Typically produces 10-12 fruits per plant, with vines reaching 15' long. Our improved strain has a high percentage of clean, non-warty and uniform squash. Fruits have a gray button on the blossom end.

- Uniform fruits
- Large, prolific vines
- 3-5 lbs
- Open-Pollinated

Seed Source: High Mowing Organic Seeds

# Spaghetti

The classic pasta alternative.

This excellent OP strain's flesh has the best noodle-like consistency in our trials. Slightly sweet, nutty flavor. Oblong in shape with ivory skin that changes to pale yellow at maturity. An excellent pasta alternative — bake or boil, fork out the flesh, and top the "spaghetti" with your favorite sauce. Short vines.

Seed Source: Johnnys Selected Seeds

Misc.  
Veggie  
Varieties

# Chioggia Beet

Improved strain of Chioggia.

The highest-quality Chioggia strain available. Medium-height tops are green with pink-striped stems. Excellent flavor. Also available with NOP-compliant pelleting. USDA Certified Organic.

Seed Source: Johnnys Selected Seeds

# Red Ace Beet

Workhorse standard red beet.

Reliable, adaptable, and fast-maturing beet with strong tops. Sweet and tender, even when older. Medium-tall, red-veined greens for bunching.

Seed Source: Johnnys Selected Seeds

# Touchstone Gold Beet

Striking golden-fleshed beet.

Smooth, golden roots with bright yellow flesh retain their color when cooked. Excellent, sweet flavor. Leaves and petioles are green.

Seed Source: Johnnys Selected Seeds

# Belstar Broccoli

A versatile broccoli with excellent heat and cold tolerance and uniform, rounded heads. Great choice for spring, summer and fall plantings with excellent vigor. Plants are compact and produce small to medium-sized heads within a 10-14-day harvest window. Domes span 6-8" and average 1.5 lbs. Plants have been known to survive 20-degree temperatures with proper frost protection and care. From our partners at Bejo Seeds.

- Compact habit
- Heat tolerant
- 6-8" heads
- Hybrid

Seed Source: High Mowing Organic Seeds

# Silvia Brussel Sprouts

Black rot resistance.

Sprouts are medium-large, round, and very dense. The plants are medium-tall, upright, and resist lodging. Similar to Dagan, but a few days later and with added disease resistance.

Seed Source: Johnny's Select Seeds

# Golden Acre Cabbage

A refined, open-pollinated cabbage with round green heads encasing beautiful, tender white hearts.

Plants mature early and are compact, perfect for dense plantings with tighter spacing while still producing good yields of marketable heads. Heads are round, solid, and have a delicate, crunchy flavor that is suitable for most kitchen preparations. When cooked, the spicy cabbage flavor becomes mild and buttery. An excellent OP for the serious cabbage grower.

- Early fresh market
- Compact habit
- 3-4 lb heads
- Open-Pollinated

Seed Source: High Mowing Organic Seeds

# Farao Organic Cabbage

Delicious early cabbage.

Attractive deep green, 3 lb. heads are filled with tender, thin, crisp, peppery-sweet leaves. Holds well in the field and is slow to split. USDA Certified Organic.

Seed Source: Johnny's Select Seeds

# Ruby Perfection Cabbage

The #1 mid-late red cabbage. The heads are medium-size and dense with a uniform high-round shape and good wrapper leaves. Good field-holding ability. Matures just in time for late summer crops or fall harvest for medium-term storage. Avg. weight: 3 1/2 lb. Resistant to thrips.

Seed Source: Johnnys Selected Seeds

# Amarant Red Cabbage

Strikingly beautiful red coloration on compact heads with good crunch, sweet flavor and juicy texture.

Short stems and highly flattened outermost leaves make heads visible and easy to harvest. Tolerance to heat allows for early and main season growing. Darker purple interior than Red Express. This open pollinated variety is bred by Kultursaat biodynamic seed initiative in Germany.

- Fresh market
- Heat tolerant
- 1.25-2.5 lb heads
- Open-Pollinated

Seed Source: High Mowing Organic Seeds

# Lavender Cauliflower

Well-domed, violet heads.

Attractive, bright purple florets make Lavender a great choice for dipping platters. Stems are a beautiful medium-purple in fall, paler in spring. Compared to Graffiti, heads are a much brighter violet-purple and have a slightly larger dome. Performs best for fall crops but may also be grown successfully for summer crops.

Seed Source: Johnnys Selected Seeds

# Puntoverde Romanesco

Hybrid, specialty. Attractive, high-quality heads for summer or fall harvest. Produces excellent fall crops and, unlike other romanesco types, produces very good summer crops in areas without extreme summer heat. Also suitable for winter or early spring production in areas with mild winters. Strong, rugged plants. Outperforms typical romanesco types under stressful weather conditions.

Seed Source: Johnnys Selected Seeds

# Snow Crown Cauliflower

This hybrid shows unusual seedling vigor. Good quality, medium-size heads whether harvested in summer or fall. Good tolerance to moderate fall frost (25–32°F/-4–0°C). AAS winner. NOTE: When grown under fertility or moisture stress all cauliflower, but particularly Snow Crown, can show a purplish coloration on the undersides of the heads.

Seed Source: Johnny's Select Seeds

# Nigral Eggplant

Improved Black Italian type.

Traditional appearance with modern advantages. Spineless plant reliably sets fruit under variable conditions. Heavy yields. An earlier, improved eggplant over Nadia. Green calyx.

Seed Source: Johnnys Selected Seeds

# Annina Eggplant

Prolific yields of lovely striped fruit on upright, spineless plants.

Performs just as you expect a hybrid to, but with the aesthetic and flavor of the most cherished heirloom. Glossy, teardrop shaped fruits are uniform and gorgeous with bright green calyxes. An excellent producer both in the field and in the greenhouse, offering great versatility in production.

- Spineless
- Greenhouse or field
- 5-7" fruit
- Hybrid

Seed Source: High Mowing Organic Seeds

# Fairy Tale Eggplant

Purple-and-white mini eggplant.

Attractive, 2–4" long by 3/4–1 1/4" diameter, fruits are borne abundantly on compact 18–24" plants. Wonderful flavor with no bitterness and very few seeds. Some fruits may be harvested in clusters. Green calyx. AAS winner.

Seed Source: Johnnys Selected Seeds

# Orient Express Eggplant

The most dependable Asian eggplant.

High-yielding plants produce armloads of attractive, slender, glossy fruits 8–10" long by 1 1/2–2 1/2" diameter. Ready up to 2 weeks before other early varieties. Sets fruit in cool weather and under heat stress. Tender, delicately flavored, and quick-cooking. NOTE: Has a tendency towards slow emergence, and may need more time to germinate than other eggplant varieties. Purple calyx.

Seed Source: Johnnys Selected Seeds

# Preludio Fennel

Big rounded bulbs from organic seeds.

Heavy bulbs are uniform, high yielding, and offer the traditional anise flavor. Suitable for late summer and early fall harvest in most areas. Preludio can also be transplanted in January for an April harvest in areas with mild winters, such as coastal California.

Seed Source: Johnnys Selected Seeds

# Konan Kohlrabi

Premium organic kohlrabi.

A uniform and attractive variety. Excellent flavor, with a nice, crisp texture. Harvest when 2–3" in diameter. Slightly bigger tops and a day later than Korist, which it replaced. AAS winner. USDA Certified Organic.

Seed Source: Johnnys Selected Seeds

# Kolibri Kohlrabi

Prettiest, most uniform purple variety.

3" bulbs with uniform, deep purple skin and nearly fiberless, crisp, white flesh.

Seed Source: Johnnys Selected Seeds

# Bilko Napa Cabbage

Disease resistant, dense heads with crispy, tender texture.

Broad white midribs and pale green outer leaves with a creamy yellow interior. Larger than Emiko F1 with similar barrel shape. Andy Jones of the Intervale Community Farm uses it to supply Napa cabbage to his CSA into late fall. From our partners at Bejo Seeds.

- Long storage
- 12" heads
- Hybrid

Seed Source: High Mowing Organic Seeds

# Toma Verde Tomatillo

Early green tomatillo.

Early maturing, large, flat-round green fruits. Use in salsa or Mexican cooking.

Seed Source: Johnnys Selected Seeds

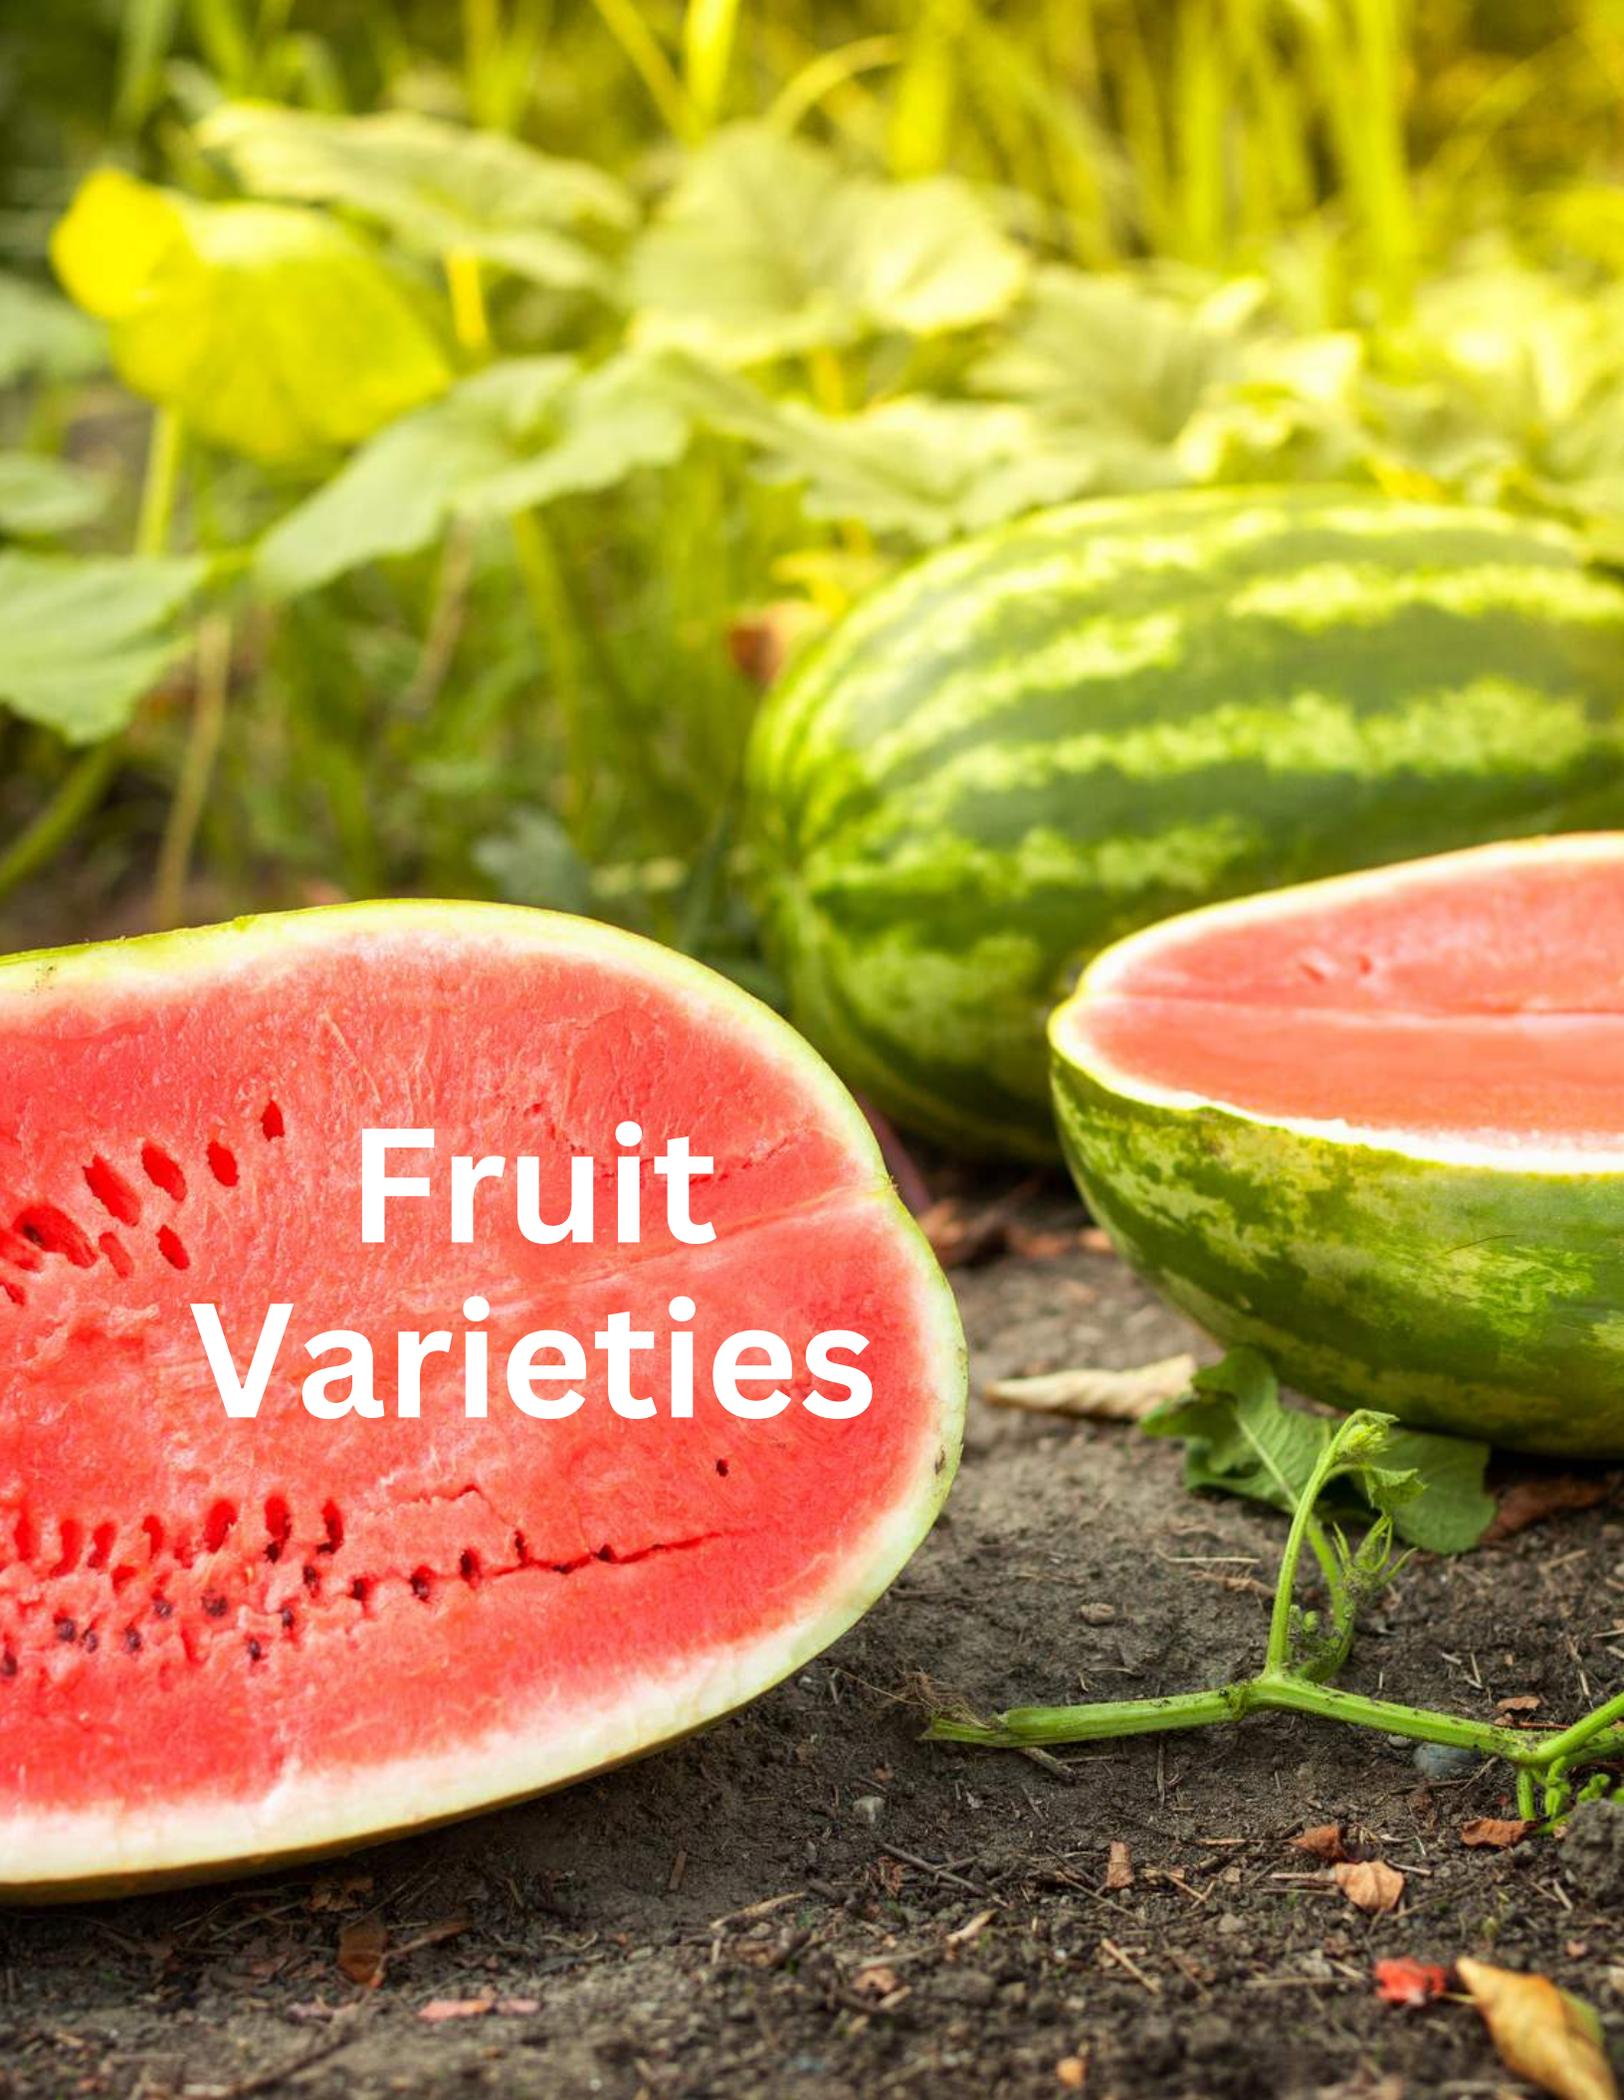

# Walla Walla Sweet Onion

The famous, mild yellow variety from Walla Walla, WA.

Juicy, sweet, regional favorite. In the Northwest, which has normal low winter temperatures above -10°F (-23°C), seed is sown in late August, and a crop of very large, flattened, ultra-mild onions is harvested early the next summer. **SPRING PLANTING:** Walla Walla may be spring planted using seeds or plants in colder regions where winter survival is hit or miss. It is not as big or sweet as the wintered-over crop, but still milder and juicier than others from spring planting. Nice as a "green top" onion. Not for storage.

Seed Source: Johnnys Selected Seeds

# Fruit Varieties

# PMR Delicious 51

Reliably early melon, ripening quickly for heavy yields of aromatic fruit.

Juicy, perfectly sweet flesh is dark orange with creamy texture and strong flavor.

Thinner skin than hybrids but holds well for market and in storage. Excellent resistance to powdery mildew and well adapted for northern growers. Harvest at full slip. Bred by Dr. Henry Munger at Cornell University. A portion of sales for this variety is paid to the breeder - learn more here.

- Eastern-type
- 2-3 lbs
- BR
- Open-Pollinated

Seed Source: High Mowing Organic Seeds

# Honey Rock Melon

- Vigorous plants produce flavorful salmon-colored flesh
- Large, heavy yielder
- Wonderful flavor!
- Prefers full sun exposure

Seed Source: Eden Brothers

# Victoria Rhubarb

- Heirloom variety from 1800's
- Crimson and green, thick stems
- No stringiness

Victoria has stood the test of time-this heirloom favorite has been planted in kitchen gardens for years. This hardy perennial is a must-have for every gardener. Broad green stalks with a tint of crimson are not tough or stringy and are excellent for cooking. Resistant to deer, no pest or disease-related problems. Zones 3-7.

Plug Source: Swift Greenhouses

# Crimson Sweet

Quality and reliability in a classic oblong melon with juicy sweet flesh.

An excellent variety for gardeners and growers alike, with vibrant red, firm, fine-textured flesh and silver and dark green striping.

- Classic sweet flavor
- 15-25 lbs
- Open-Pollinated

Seed Source: High Mowing Organic Seeds

# Sugar Baby

The standard of small watermelons.

Round fruits, 6–8" in diameter, averaging 8–10 lb. Ripe melons are almost black. Good flavor. Tough rinds resist cracking. The standard of "icebox" melons for many years.

Seed Source: Johnnys Selected Seeds

# Yellow Petite

- Lightly sweet and aromatic icebox variety
- Light Green Rind with Dark Green Stripes; Lightly Sweet, Aromatic Yellow Flesh
- Space Saving, Icebox Variety; Early to Mature
- Prefers Full Sun Exposure and Warm Weather

Seed Source: Eden Brothers

# Goldie Ground Cherry

Small orange berry with a husk.

A conversation piece at markets, well liked by children. This old-fashioned tomato family member bears 1/2– 3/4" sweet golden berries inside papery husks, resembling small, straw-colored Japanese lanterns. The flavor is quite sweet and a bit wild. Plants are profusely branching, prolific, and drop ripe fruits. Fruits can be eaten raw, dried like raisins, frozen, canned, or made into preserves, cooked pies, and desserts. USDA Certified Organic.

Seed Source: Johnnys Selected Seeds

# Rosy Belle Strawberry

Rosy Belle™ is both beautiful and tasty with rosy pink blooms and sweet berries that grow abundantly from spring until frost. Perfect as a border plant or grown in pots, these ornamental berries will have you cooking up all kinds of delicious treats!

2 quart Bushel & Berry product

Plant Source: Seester Farms

# Snowy Belle Strawberry

Snowy Belle™ is a deliciously sweet treat to grow in the garden and enjoy at the table. This strawberry variety has big white flowers that produce an abundance of flavorful fruit. Shiny, bright red strawberries are perfect for using in pies, jams and fruit salads!

2 quart Bushel & Berry product

Plant Source: Seester Farms

# Baby Cakes Blackberry

Baby Cakes® is a dwarf, thornless blackberry perfect for patio pots with its compact habit. In summer, large, classic and sweet tasting berries present on the plant in a fireworks-like spray of fruit. In most regions, this blackberry will produce twice in one season!

2 quart Bushel & Berry product

Plant Source: Seester Farms

# Heritage Raspberry

Heritage everbearing red raspberry is a favorite for its flavor, firmness and fruit size. This variety produces abundant crops of large, sweet, dark red berries that are perfect for eating fresh, canning, freezing, or making jams and jellies. These self-supporting, upright canes are hearty enough to grow in poor soil, but requires a well-drained site.

Plant Source: Seester Farms

# Raspberry Shortcake

This revolutionary thornless raspberry offers everyone a chance to enjoy raspberries like never before! Raspberry Shortcake® is compact, with a rounded growth habit, and it thrives in a patio pot or in the landscape. Perfect for children and adults, this carefree, nutritious raspberry requires no staking or big garden spaces. Its sweet, vanilla flavor is uniquely delicious!

2 quart Bushel & Berry product

Plant Source: Seester Farms

# Black Lace Elderberry

Black Lace® elderberry is a perfectly stylish addition to your landscape. Intense purple black foliage is finely cut like lace, giving it an effect similar to that of Japanese maple. Indeed, some designers are using it in place of more sensitive plants since Black Lace is extremely durable and adaptable. Pink flowers in early summer contrast with the dark leaves for a stunning effect and give way to black berries if a compatible pollinator is planted nearby. Awards: Silver Medal, Royal Boskoop Horticulture Society.

# Madonna Elderberry

As flashy as its namesake,(or almost?!), the foliage of this dramatic large 6-10' shrub is splashed brightly and irregularly with gold and perhaps the most colorful of the elders; large clusters of black berries follow white flowers.

# Bluegold Blueberry

Bluegold blueberry is a mid-season variety that is highly productive, with superior quality berries for midseason. Fruit ripening is concentrated, with harvesting in 1 or 2 picks. The plant grows compact, spreading somewhat, is a great addition to any landscape. The mature height is 4–6', with yellow fall foliage.

# Jelly Bean Blueberry

Jelly Bean® has large, flavorful blueberries mid-summer that taste like homemade sweet blueberry jelly. The foliage is unlike other blueberries and has unique, elongated, green leaves with highlights of red in cooler climates. Try a mini-hedge along a pathway, in the landscape or in decorative patio containers.
