Local Roots, National Impact: Strengthening Communities, One Hand at a Time

HEALTHCARE & SOCIAL ASSISTANCE

The US Medical Foundation provides assistance and supports local support programs along with city, state, and national charitable initiatives. In Harvard, the foundation is supporting youth sports, providing utility funding for families facing hardship, and building emergency savings for employees. We have donated thousands of boxes of medical gloves to first responders and healthcare centers and continue to explore new ways to add value in our community and industry.

UTILITY ASSISTANCE PROGRAM

The US Medical Foundation has generously supported the City of Harvard Utility Assistance program, aiming to alleviate financial burdens for individuals on the verge of eviction by covering past-due balances and reconnection bills. This initiative demonstrates a commitment to community well-being, offering vital assistance to those in need and promoting housing stability in the face of financial challenges. Through this program, the Foundation and the City of Harvard collaborate to make a meaningful impact on the lives of individuals and families, ensuring access to essential utilities.

ONE HAND AT A TIME

Donations of our American Made Nitrile Gloves to Aurora Fire Department, Open Door Health Center, and Kendall County Jail and Sheriff's Office is the least we can do. We thank you all for your service! With our Foundation we will continue to support our local friends and neighbors, open our doors to critical training for special forces and fire departments and those in need and grow our initiatives and outreach in building a stronger community.
