## Japanese Garden Tools

### **History.**

Maruyoshi are the distribution agent for our range of high quality Japanese garden tools.

### **Flax Cutters.**

A great hand tool for cutting all fibrous plants, like flax and cabbage tree leaves.

### **Hori Hori's (weeding knife).**

A wonderful tool for the garden with a serrated multi-purpose steel blade designed for jobs such as digging and cutting, all round weeding, bulb planting and general subterranean rummaging. Available in 2 sizes.

### **Grubbers.**

A tool that's great for ground work in the garden. Available in short handle right and left hand options, and also a long handle version.

### **Planting Hoes.**

A strong short-handled tool designed for ground work, tackling tough weeds and breaking up hard clay soil. Available in both wide and narrow blades.

### **Carbon Steel Blades.**

Forged from the finest Japanese steel, these blades will stay sharp for an extremely long time and will consistently give a clean and precise cut.
