

# WHY BUY

# okatsuna

## **History.**

Okatsune are based in Hiroshima, Japan, and have been manufacturing sharp and durable cutting tools for over 70 years.

## **Thinning and Harvesting Shears.**

Very light and razor sharp, the 304 thinning shears are specially designed for the cutting and thinning of plants, harvesting fruit, and cutting flowers. The 301 snip has a short curved blade, and the 306 has a straight blade, and both have rounded tips to prevent damage when harvesting vegetables and fruit.

## **Secateurs.**

Allowing up to cuts of 25mm, these secateurs combine the hardness of the blades with a special flexibility so that the cutting blade always aligns with the counter-blade, even after extensive use. Available in 3 sizes to suit your hands.

## **Hedge Shears.**

With handles made from Japanese White Oak, these tools will absorb vibrations, are user friendly and very enjoyable to work with.

## **Carbon Steel Blades.**

Forged from the finest Japanese steel, these blades will stay sharp for an extremely long time and will consistently give a clean and precise cut.
