

Healing Light Therapy

Stimulating the body's natural healing process

Light therapy device for the treatment/improvement of all kinds of ear disorders including tinnitus (EARRLT)

Light therapy is an innovative method that can contribute to ear health. Targeted light waves improve blood flow in the ear and stimulate cell regeneration. This can help reduce inflammation, support the natural healing process and improve overall hearing comfort. Light therapy is increasingly being used as a natural and painless way to relieve symptoms such as tinnitus and other ear conditions.

Tinnitus and other hearing problems can have a major impact on daily life. The constant ringing, wheezing or feeling of pressure in the ears can lead to fatigue, stress and difficulty concentrating. Light therapy offers a natural approach to alleviate these symptoms by helping the ear structures function better and supporting the recovery process.

Factsheet

What are the benefits?

- **Reduced tinnitus:** through improved blood flow and cell activation, light therapy can help reduce tinnitus and lessen the impact of tinnitus on daily life.
- **Improved inner ear blood flow:** therapy promotes blood flow to the inner ear, which can help repair damaged cells and nerves.
- **Relaxation and stress reduction:** light therapy calms the nervous system, reduces stress and thus can contribute to relief of tinnitus and other ear problems, promoting general well-being.
- **Supports recovery from hearing problems:** ear conditions such as inflammation or hearing loss due to reduced blood flow can benefit from light therapy, which activates cell regeneration and supports tissue repair.
- **Improves sleep quality:** due to the calming effect of light therapy on the nervous system, it can help reduce the symptoms of tinnitus, leading to more restful sleep.
- **Painless, safe and easy to use:** unlike invasive treatments or medication, light therapy has no side effects and is a natural way to support your hearing.

Product features:

- 2 red-light ear therapy earbuds: 650nm wavelength (color) for a profound effect.
- Scientifically based, with publications.
- No harmful electrical or magnetic radiation (EMF radiation).
- Fully waterproof for hygienic use and easy cleaning.

Product specifications:

Actual power:	2W
Number of LEDs:	2 x 0.5W (via 2 ear therapy earbuds)
Wavelength (color):	650nm
Timer/program:	Runs automatically – 30 mins time duration
Other features:	Portable, with power bank and AC charger
	Pulsating and continuous operation
LED life time:	>50.000 hours
