

# Healing Light Therapy

Stimulating the body's natural healing process

## Multifunctional Beauty Device for Skin Care

Light therapy describes the use of wavelengths of light (colors) to stimulate, heal, regenerate, and protect cells that have either been injured, are degenerating, or else are at risk of dying.

This 3-in-1 beauty device designed to activate topical skin care to reveal radiant, younger looking skin or eliminate acne causing bacteria. It also has anti-inflammatory characteristics and reduces visible redness caused by rosacea or other skin conditions.

Light therapy is a non-invasive, non-surgical face lift alternative, helping the skin maintain elasticity and firmness, while refining texture and smoothing lines and wrinkles.

This highly effective and UV-free treatment can be used on all skin types.

# Factsheet

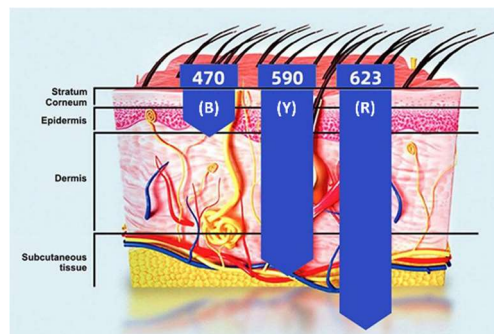

## Effects of wavelengths:

This beauty device uses 3 different wavelengths (colors) to reach different layers of the skin and target different skin concerns:

### Blue light (470nm)

Kills acne-causing bacteria beneath the skin. This will clear up existing acne and prevent future breakouts without the use of medication.

### Yellow light (590nm)

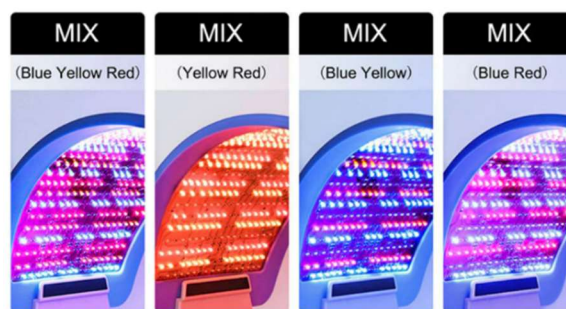

Is excellent for the treatment of skin redness from inflammation, sunburn and rosacea. It also reduces pigment, promotes lymphatic detox, improves skin texture and wrinkles.

### Red light (623nm)

Penetrates deeper into the skin to improve skin texture and erase the appearance of aging skin, fine lines, wrinkles, crow's feet, and brown spots.

## Product features:

- 3 LED wavelengths (colors) for optimal results
- 7 lighting modes (user selectable): 3 colors and 4 mixed colors
- A pulse option for an intensified treatment
- You can dome the panel over the face or use the stands
- Lightweight and portable so you can take your LED light device with you anywhere
- Real results in only 25 minutes per day

## Product specifications:

Product size:	545x235x30mm
Wavelength (color):	470nm; 590nm; 623nm
Number of LEDs:	573 LEDs
Rated power:	16W
Time control:	25 minutes (fixed)
Other features:	Pulse option

## Product detail:

Photon light therapy device

Fixed bracket

Goggles

Controller

US/British/EU conversion head

Power adapter

Pillow

Bandage
