

Healing Light Therapy

Stimulating the body's natural healing process

Beauty Table Device for Healthier and Smoother Skin

Light therapy describes the use of wavelengths of light (colors) to stimulate, heal, regenerate, and protect cells that have either been injured, are degenerating, or else are at risk of dying.

This 3-in-1 beauty device designed to activate topical skin care to reveal radiant, younger looking skin or eliminate acne causing bacteria. It also has anti-inflammatory characteristics and reduces visible redness caused by rosacea or other skin conditions.

Light therapy is a non-invasive, non-surgical face lift alternative, helping the skin maintain elasticity and firmness, while refining texture and smoothing lines and wrinkles.

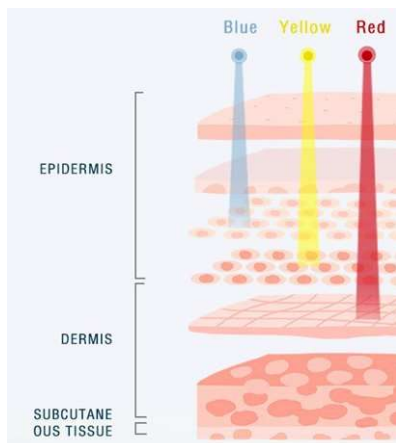

This highly effective and UV-free treatment can be used on all skin types.

Factsheet

Effects of wavelengths:

This table device uses 3 different wavelengths (colors) to reach different layers of the skin and target different skin concerns:

Blue light (470nm) helps calm and heal existing blemishes and reduces future acne-breakouts by eliminating acne-causing bacteria. Blue light also helps to purify the skin, stabilize oil glands, is excellent for balancing the pH, and soothes inflammation.

Yellow light (590nm) has anti-inflammatory characteristics and reduces visible redness caused by rosacea or other skin conditions. It improves elasticity of skin by increasing collagen in the damaged areas and helps to remove toxins by stimulating lymphatic drainage. It will assist in strengthening the muscles under the epidermis, bringing tightness back to skin.

Red light (623nm) penetrates deeper into the skin to improve skin texture and erase the appearance of aging skin, fine lines, wrinkles, crow's feet, and brown spots. It enhances cellular metabolism, accelerates the repair and replenishment of damaged skin cells, and stimulates the production of structural proteins to help produce healthy and vibrant skin.

Product features:

- Custom made table device containing 3 LED wavelengths (colors) for optimal results
- Dimming (brightness control) for easy intensity setting
- 7 lighting modes (user selectable): 3 colors and 4 mixed colors.
- Lightweight and portable so you can take your LED light panel with you anywhere
- Time control

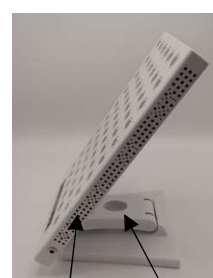

Product specifications:

Product size:	30x20x3cm
Wavelength (color):	470nm; 590nm; 623nm=1:1:1
Number of LEDs:	60x5W
Time control:	Selectable up to 30 mins
Material:	Metal housing, white

Product detail:

LED light table device

Air vent

Support frame

Adaptor

Goggles

Power cord

Ordering information:

Article number	Product description
TBL002	3-color table device – white housing - 50W actual - 60 LEDs - 470:590:623=1:1:1
