INTELLICENTER® POOL CONTROL SYSTEM: FREQUENTLY ASKED QUESTIONS (FAQs)

What are the different products that make up the IntelliCenter System family?

There are three offerings in the IntelliCenter family of products:

- IntelliCenter System
- IntelliCenter® Lite System
- IntelliCenter® Upgrade Kit for EasyTouch®/IntelliTouch®

Features are consistent across all IntelliCenter Pool Control System products.

What kind of equipment can I control with IntelliCenter System?

The IntelliCenter system can control up to 40 auxiliary circuits, which are defined as High Powered AC Voltage (120VAC & 240VAC) not exceeding three horsepower, and this includes the following features:

- Pool pumps (single or variable speed)
- Pressure-side cleaner pumps
- Lights (colored or white)
- Sanitization equipment (e.g., IntelliChlor® Salt Chlorine Generator)

It also includes 32 feature circuits. These can control additional speeds on a variable speed pump or a valve actuator to assign without using an existing auxiliary circuit.

IntelliCenter can also be set up on the customer's internet and controlled remotely via the IntelliCenter2 app.

How does IntelliCenter work?

The IntelliCenter system works in a variety of ways. The IntelliCenter System works with the IntelliCenter2 app and other available control panel options, including:

- A main panel utilizing a full-capacity touchscreen
- Any expansion panel (same screen as the main)
- Wired indoor remote (same screen as main)
- Wired spa side remote (push button)

Connect the IntelliCenter Pool Control System to your home WiFi network (direct wired Ethernet or wireless connection kit), download the app, add your equipment, and start scheduling your desired routines.

Can the IntelliCenter System help me automate my pool schedule?

Yes! The IntelliCenter System makes programming pool heater settings and lighting adjustments easily manageable through the IntelliCenter2 app. The easy-to-use interface allows for monitoring or controlling your pool automation system from anywhere.

Will the IntelliCenter System alert me of potential issues with my pool and equipment?

The IntelliCenter System offers real-time alerts and status information for the main and expansion panels via the IntelliCenter2 app. The system can notify you when attention is needed to address potential issues before they negatively impact your pool or equipment.

Will the IntelliCenter System help make my pool system run more efficiently?

In addition to making it easy to automate your pool schedule, the IntelliCenter System also provides you with information on your equipment's performance. This information can help you make any adjustments needed to optimize the efficiency and performance of equipment, which can help reduce operating costs and maintenance.
